Geometry, Particles, and Fields Bjoern Felsager, 2012-12-06 Geometry Particles and Fields is a direct reprint of the first edition From a review of the first edition The present volume is a welcome edition to the growing number of books that develop geometrical language and use it to describe new developments in particle physics It provides clear treatment that is accessible to graduate students with a knowledge of advanced calculus and of classical physics The second half of the book deals with the principles of differential geometry and its applications with a mathematical machinery of very wide range Here clear line drawings and illustrations supplement the multitude of mathematical definitions This section in its clarity and pedagogy is reminiscent of Gravitation by Charles Misner Kip Thorne and John Wheeler Felsager gives a very clear presentation of the use of geometric methods in particle physics For those who have resisted learning this new language his book provides a very good introduction as well as physical motivation The inclusion of numerous exercises worked out renders the book useful for independent study also I hope this book will be followed by others from authors with equal flair to provide a readable excursion into the next step

The Sensual (quadratic) Form John Horton Conway, 1997-12-31 John Horton Conway s unique approach to quadratic forms was the subject of the Hedrick Lectures that he gave in August of 1991 at the Joint Meetings of the Mathematical Association of America and the American Mathematical Society in Orono Maine This book presents the substance of those lectures The book should not be thought of as a serious textbook on the theory of quadratic forms It consists rather of a number of essays on particular aspects of quadratic forms that have interested the author The lectures are self contained and will be accessible to the generally informed reader who has no particular background in quadratic form theory The minor exceptions should not interrupt the flow of ideas The afterthoughts to the lectures contain discussion of related matters that occasionally presuppose greater knowledge
