Cash Ed.D. educational consultant author *Advancing Differentiation Thinking and Learning for the 21st Century* *Abstract Mathematical Cognition* Wolfgang Grodd, Philippe Chassy, 2016-08-09 Despite the importance of mathematics in our educational systems little is known about how abstract mathematical thinking emerges Under the uniting thread of mathematical development we hope to connect researchers from various backgrounds to provide an integrated view of abstract mathematical cognition Much progress has been made in the last 20 years on how numeracy is acquired Experimental psychology has brought to light the fact that numerical cognition stems from spatial cognition The findings from neuroimaging and single cell recording experiments converge to show that

numerical representations take place in the intraparietal sulcus Further research has demonstrated that supplementary neural networks might be recruited to carry out subtasks for example the retrieval of arithmetic facts is done by the angular gyrus Now that the neural networks in charge of basic mathematical cognition are identified we can move onto the stage where we seek to understand how these basics skills are used to support the acquisition and use of abstract mathematical concepts

Negotiating Malay Identities in Singapore Rizwana Abdul Azeez,2016-03-01 Singapore Malays subscribe to mostly traditional rather than modern interpretations of Islam Singapore state officials however wish to curb the challenges such interpretations bring to the country s political social educational and economic domains Thus these officials launched a programme to socially engineer modern Muslim identities amongst Singapore Malays in 2003 which is ongoing *Negotiating Muslim Identities* documents a variety of ethnographic encounters that point to the power struggles surrounding two basic and very different ways of living While the Singapore state has gained some successes for its project it has also faced significant and multiple setbacks Amongst them state officials have had to contend with traditional Islamic authority that Malay elders carry and who cannot be ignored because these elders are time entrenched authority figures in their community One of the book s

significant contributions is that it documents how Singapore an avowedly secular state has now turned to Islam as a tool for governance Just as significant are the insights the study provides on another aspect of Singapore state governance one usually described as authoritarian The book demonstrates that even authoritarian states can face serious obstacles in the face of religion s influence over its followers The academic literature on Singapore Malays is sparse this work not only fills gaps in the existing academic literature but provides new and original research data Its data rich ethnographic and anthropological approach show the complexities of Malay and Muslim social contexts and complements other works that examine Southeast Asian states management of Islam which has attracted much scholarship given the global interest in Islam based politics and social organisation

BRICS: building education for the future; priorities for national development and international cooperation Leclercq, François,2014-09-22

The Palgrave Handbook of Global Politics in the 22nd Century Laura Horn,Aysem Mert,Franziska Müller,2023-01-01 This handbook offers a unique approach to the question How do scholars write the future of global politics Written in futur ant rieur style around the 200 year anniversary of the birth of International Relations IR as an academic discipline the contributions engage in world building and imagine different futures of IR Set in a multiverse 23 chapters draw on a range of possible themes and imaginaries for instance post pandemic conditions the Anthropocene and not least academic practices and the role of researchers A concluding chapter anchors these explorations in contemporary discussions The book mirrors

the format and style of existing handbooks combining outlines and discussions of theories structures processes and core issues in IR with an academic science fiction account of how these might play out over the course of the next century In doing so the book challenges IR and provides alternative imaginaries rather than predicting future conditions for all humanity The book invites readers to reflect on how thinking about the future has become an increasingly radical but more than ever necessary act

California Dreaming Lawrence J. McQuillan, 2015-05-01 A politically created crisis of epic proportions is brewing in California and elsewhere across the United States For decades public pension officials and politicians of both parties have promised their employees increasingly generous retirement benefits while low balling the contributions from government agencies and employees that are needed to cover these promises presenting our greatest financial challenge since the Great Depression Pushing the pension liability from today and onto our children and grandchildren leaves them with a depleted future and a potentially bankrupt California State and local governments will scramble to find funds forcing them to raise taxes slash public services and or declare bankruptcy Schools parks emergency services and public employee retirement benefits will be at risk Politicians will defer until circumstances force them to reckon with a disaster of their own making The problem For far too long state and local governments have promised their employees increasingly generous retirement benefits but without ensuring that sufficient funds will be on hand when the pension payments come due In California Dreaming Lawrence J McQuillan pulls back the curtains covering this unfunded liability crisis He describes the true extent of the problem explains the critical factors that are driving public pension debt sky high and exposes the perverse incentives of lawmakers and pension officials that reward them for not fixing the problem and letting it escalate Finally he offers the six crucial reforms needed to restore the financial health of California and other threatened jurisdictions If California Dreaming s roadmap for reform is adopted the prospects for achieving a thriving balanced and equitable future are highly favorable in California and any state or municipality facing its own public pension problem If not the many opportunities that once made the Golden State seem like a Promised Land will quickly evaporate
