Figure 1. A schematic diagram of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group received a standard training program, while the experimental group received a modified training program. The experimental group was further divided into two subgroups: the low-intensity group and the high-intensity group. The low-intensity group received a low-intensity training program, while the high-intensity group received a high-intensity training program. The subjects were then subjected to a series of tests to measure their performance and physiological responses.
