Parents with Mental and/or Substance Use Disorders and their Children, volume III Anja Wittkowski, Joanne Nicholson, Jean Lillian Paul, Geneviève Piché, 2025-07-30 Families living with parental mental and/or substance use disorders continue to face considerable biopsychosocial challenges with complex pathways to mitigating risk, enhancing resilience and supporting recovery. An ecological life span approach to improving outcomes for all family members: infants, children, adolescents and adults who are parents requires careful consideration of sociocultural conditions, life stages and developmental ages alongside family focused needs, goals and plans. In addition, community contexts, policy developments and practice innovation play roles in contributing to the wellbeing and functioning of all family members. The risk conveyed to all family members by parental mental and/or substance use disorders is great. Fortunately, the opportunities to intervene are plentiful and varied. However, in many cases, interventions are unspecified, untested and not brought to scale in regional, state or national initiatives. We may have the requisite knowledge to inform policy and practice but this evidence may not be applied to effect innovation or change, suggesting the need for widespread knowledge translation and dissemination efforts with significant potential to improve public mental health.

Fundamentals of Materials Science and Engineering William D. Callister, David G. Rethwisch, 2022 Fundamentals of Materials Science and Engineering provides a comprehensive coverage of the three primary types of materials: metals, ceramics and polymers and composites. Adopting an integrated approach to the sequence of topics, the book focuses on the relationships that exist between the structural elements of materials and their properties. This presentation permits the early introduction of non-metals and supports the engineer's role in choosing materials based upon their characteristics. Using clear, concise terminology that is familiar to students, the book presents material at an appropriate level for student comprehension. This International Adaptation has been thoroughly updated to use SI units. This edition enhances the coverage of failure mechanism by adding new sections on Griffith theory of brittle fracture, Goodman diagram and fatigue crack propagation rate. It further strengthens the coverage by including new sections on peritectoid and monotectic reactions, spinodal decomposition and various hardening processes such as surface and vacuum and plasma hardening. In addition, all

Geography and Drug Addiction Yonette F. Thomas, Douglas Richardson, Ivan Cheung, 2008-09-24 Making Connections Geography and Drug Addiction Geography involves making connections connections in our world among people and places cultures human activities and natural processes It involves understanding the relationships and connections between seemingly disparate or unrelated ideas and between what is and what might be Geography also involves connecting with people When I first encountered an extraordinarily vibrant intelligent and socially engaged scientist at a private dinner several years ago I was immediately captivated by the intensity of her passion to understand how and why people become addicted to drugs and what could be done to treat or prevent drug addiction Fortunately she was willing to think beyond the bounds of her own discipline in her search for answers Our conversation that evening which began with her research on fundamental biochemical processes of drug addiction in the human body evolved inevitably to an exploration of the ways in which research on the geographical context of drug addiction might contribute to the better understanding of etiology of addiction its diffusion its interaction with geographically variable environmental social and economic factors and the strategies for its treatment and prevention This fascinating woman I soon learned was Nora Volkow the Director of the National Institute on Drug Abuse as well as the granddaughter of Leon Trotsky
