Guide to Mobile Data Analytics in Refugee Scenarios Albert Ali Salah,Alex Pentland,Bruno Lepri,Emmanuel Letouzé,2019-09-06 After the start of the Syrian Civil War in 2011 12 increasing numbers of civilians sought refuge in neighboring countries By May 2017 Turkey had received over 3 million refugees the largest refugee population in the world Some lived in government run camps near the Syrian border but many have moved to cities looking for work and better living conditions They faced problems of integration income welfare employment health education language social tension and discrimination In order to develop sound policies to solve these interlinked problems a good understanding of refugee dynamics isnecessary This book summarizes the most important findings of the Data for Refugees D4R Challenge which was a non profit project initiated to improve the conditions of the Syrian refugees in Turkey by providing a database for the scientific community to enable research on urgent problems concerning refugees The database based on anonymized mobile call detail records CDRs of phone calls and SMS messages of one million Turk Telekom customers indicates the broad activity and mobility patterns of refugees and citizens in Turkey for the year 1 January to 31 December 2017 Over 100 teams from around the globe applied to take part in the challenge and 61 teams were granted access to the data This book describes the challenge and presents selected and revised project reports on the five major themes unemployment health education social integration and safety respectively These are complemented by additional invited chapters describing related projects from international governmental organizations technological infrastructure as well as ethical aspects The last chapter includes policy recommendations based on the lessons learned The book will serve as a guideline for creating innovative data centered collaborations between industry academia government and non profit humanitarian agencies to deal

with complex problems in refugee scenarios It illustrates the possibilities of big data analytics in coping with refugee crises and humanitarian responses by showcasing innovative approaches drawing on multiple data sources information visualization pattern analysis and statistical analysis It will also provide researchers and students working with mobility data with an excellent coverage across data science economics sociology urban computing education migration studies and more
