Analytical Design And Control Of Electric Vehicles Power Chain:

Analytical Design and Control of Electric Vehicles Power Chain Souhir Tounsi, 2014-12-29 In this book we describe a methodology of systemic design of electric vehicles EVs power chain reducing the cost and the consumption This methodology rests on the choice of the structure and the components of this chain reducing jointly the cost and the consumption of EVs Indeed a synchronous motor structure to permanent magnets and axial flux reducing the production cost that can be presented under several configurations is defined and restrained in relation to the equivalent structure with coiled rotor or to double excitation The choice of the static converter oriented toward a structure to two levels voltage and to electromagnetic switches is in the goal to increase the reliability of the global system and to push the multiple inconveniences of the IGBTs The adaptation of this low frequency converter structure is assured by insertion of a speed amplifier to gearing Finally the modelling under the environment of Matlab Simulink of the power chain integrating a system of energy recuperation and a system of minimization of the consumption by stacking of three modules on the axis of the motor during the phases of strong acceleration validate this approach of design

Energy Efficiency in Electric Motors, Drives, Power Converters and Related Systems

Mario Marchesoni,2020-06-25 Today there is a great deal of attention focused on sustainable growth worldwide The increase in efficiency in the use of energy may even in this historical moment bring greater benefit than the use of renewable energies Electricity appears to be the most sustainable of energies and the most promising hope for a planet capable of growing without compromising its own health and that of its inhabitants Power electronics and electrical drives are the key technologies that will allow energy savings through the reduction of energy losses in many applications This Special Issue has collected several scientific contributions related to energy efficiency in electrical equipment Some articles are dedicated to the use and optimization of permanent magnet motors which allow obtaining the highest level of efficiency Most of the contributions describe the energy improvements that can be achieved with power electronics and the use of suitable control techniques Last but not least some articles describe interesting solutions for hybrid vehicles which were created mainly to save energy in the smartest way possible

Transdisciplinary Lifecycle Analysis of Systems R. Curran,N. Wognum,M.

Borsato,2015-07-15 Concurrent Engineering CE is based on the premise that different phases of a product s lifecycle should be conducted concurrently and initiated as early as possible within the Product Creation Process PCP It has become the substantive basic methodology in many industries including automotive aerospace machinery shipbuilding consumer goods process industry and environmental engineering CE aims to increase the efficiency of the PCP and reduce errors in later phases while incorporating considerations for full lifecycle and through life operations This book presents the proceedings of the 22nd ISPE Inc International Society for Productivity Enhancement International Conference on Concurrent Engineering CE2015 entitled Transdisciplinary Lifecycle Analysis of Systems and held in Delft the Netherlands in July 2015 It is the second in the series Advances in Transdisciplinary Engineering The book includes 63 peer reviewed papers and 2 keynote speeches arranged in 10 sections keynote speeches systems engineering customization and variability management production oriented design maintenance and repair design methods and knowledge based engineering multidisciplinary product management sustainable product development service oriented design product lifecycle management and trends in CE Containing papers ranging from the theoretical and conceptual to the highly pragmatic this book will be of interest to all engineering professionals and practitioners researchers designers and educators *Design, Analysis and Applications of*

Renewable Energy Systems Ahmad Taher Azar,Nashwa Ahmad Kamal,2021-09-09 Design Analysis and Applications of Renewable Energy Systems covers recent advancements in the study of renewable energy control systems by bringing together diverse scientific breakthroughs on the modeling control and optimization of renewable energy systems as conveyed

by leading energy systems engineering researchers The book focuses on present novel solutions for many problems in the field covering modeling control theorems and the optimization techniques that will help solve many scientific issues for researchers Multidisciplinary applications are also discussed along with their fundamentals modeling analysis design realization and experimental results This book fills the gaps between different interdisciplinary applications ranging from mathematical concepts modeling and analysis up to the realization and experimental work Presents some of the latest innovative approaches to renewable energy systems from the point of view of dynamic modeling system analysis optimization control and circuit design Focuses on advances related to optimization techniques for renewable energy and forecasting using machine learning methods Includes new circuits and systems helping researchers solve many nonlinear problems

Critical Energy Minerals: A Material Enabler for Carbon Neutrality Xiangyun Gao,Xiaoqi Sun,Zhi Cao,Weiqiong Zhong,2024-04-09 In line with the Paris Agreement the global community has committed to holding the rise in global temperatures below 1.5 °C pre industrial levels At COP26 held recently in Glasgow participating parties are expected to strengthen their commitment to ambitious 2030 emissions reduction targets to achieve net zero emissions by the middle of the 21st century Achieving these ambitious climate goals requires all countries to phase out coal consumption speed up electrification of transport technologies and mobilize significant investment in renewable energy technologies

Spacecraft Lithium-Ion Battery Power Systems Thomas P. Barrera,2022-11-21 Spacecraft Lithium Ion Battery Power Systems Provides Readers with a Better Understanding of the Requirements Design Test and Safety Engineering of Spacecraft Lithium ion Battery Power Systems Written by highly experienced spacecraft engineers and scientists working at the forefront of the aerospace industry Spacecraft Lithium Ion Battery Power Systems is one of the first books to provide a comprehensive treatment of the broad area of spacecraft lithium ion battery LIB power systems technology The work emphasizes the technical aspects across the entire lifecycle of spacecraft LIBs including the requirements design manufacturing testing and safety engineering principles needed to deploy a reliable spacecraft LIB based electrical power system A special focus on rechargeable LIB technologies as they apply to unmanned and crewed Earth orbiting satellites planetary mission spacecraft such as orbiters landers rovers and probes launch vehicle and astronaut spacesuit applications is emphasized Using a system s engineering approach the book bridges knowledge gaps that typically exist between academic and industry practitioners Key topics of discussion and learning resources include Detailed systematic technical treatment of spacecraft LIB based electrical power systems across the entire LIB lifecycle Principles of lithium ion cell and battery design and test LIB sizing battery management systems electrical power systems safety engineering ground and launch site processing and on orbit mission operations Special topics such as requirements engineering qualification testing thermal runaway hazards dead bus events life cycle testing and prediction analyses on orbit LIB power system management and spacecraft EPS passivation strategies Comprehensive discussion of on orbit and emerging space applications of LIBs

supporting various commercial civil and government spacecraft missions such as International Space Station Galileo James Webb Telescope Mars 2020 Perseverance Rover Europa Clipper Cubesats and more Overall the work provides professionals supporting all aspects of the aerospace marketplace with key knowledge and highly actionable information pertaining to LIBs and their specific applications in modern spacecraft systems
