Uttal, 2014-06-27 Originally published in 1973 this book deals with what were even at that time the well known neural coding processes of the sensory transmission processes The book was written to demonstrate the common features of the various senses It concentrates on the most peripheral neural aspects of the senses starting with the physical transduction process and culminating in the arrival of signals at the brain **A Text-book of Human Anatomy** Alexander Macalister, 1889

The Uttal Tetralogy of Cognitive Neuroscience William R. Uttal, 2022-07-30 These four volumes originally published between 1973 and 1988 were intended to provide a broad survey of cognitive neuroscience a field known variously as physiological psychology or psychobiology in the 1970s and 1980s when the books were written The general goal was to summarize what was known about the relation between brain and mind at that time with an emphasis on sensory and perceptual topics Out of print for many years the Tetralogy is now available again as a set for the first time which is as the author envisaged it or as individual volumes *The Psychobiology of Mind* William R. Uttal, 2014-06-27 Originally published in 1978 this book develops a conceptual synthesis of the field of physiological psychology the science specifically concerned with the relationship between the brain and the mind It was designed to elucidate the important questions under investigation the basic intellectual and technical problems that were encountered and the significance of the major empirical results of the time Of equal or even greater importance is the author s derivation of the general principles relating brain and mind that had emerged after decades of modern research into this important question Included in the volume are historical and philosophical perspectives on the mind brain problem as well as extensive discussions of instruments methodology empirical findings and theory Here is a powerful heuristic tool that informs the reader about the concepts and ideas implicit in this science rather than simply exhaustively listing experimental results The author does not ignore findings he organizes them into three broad categories localization representation and learning then emphasizes the relationships among

experiments This is a book that synthesizes integrates and stresses concepts principles and problems The careful organization of the book makes it especially useful for students of brain and mind at all levels
