Resources in Education ,1994-02 **Problem Solving in Mathematics Education** Kinga Szűcs,2011-06-30 ProMath is a small group of didacts of mathematics who have the common scientific interest on problem solving activities in mathematics education The 12th meeting of this group the 12th international ProMath Conference was hold at the Friedrich Schiller University of Jena Germany 10 12 September 2010 This volume contains almost all the papers regarding to the presentations which were given during the meeting **Psychomythics** William R. Uttal,2014-04-04 Psychology deals with the most complex subject matter of any science As such it is subject to misunderstandings artifacts and just simple errors of data logic and interpretation This book teases out the details of some of the sources of these errors It considers errors in psychological data and theories that arise from confusing endogenous and exogenous causal forces in perceptual research misinterpreting the effects of inevitable natural laws as psychological phenomena improper application of statistics and measurement and flawed assumptions Examples of each of these sources of error are presented and discussed Finally the book concludes that a return to a revitalized kind of behaviorism is preferred rather than continuing on the current cognitive path Recent Challenges in Intelligent Information and Database Systems Edward Szczerbicki,Krystian Wojtkiewicz,Sinh Van Nguyen,Marcin Pietranik,Marek Krótkiewicz,2022-11-23 This book constitutes the refereed proceedings of the 14th Asian Conference on Intelligent Information and Database Systems ACIIDS 2022 held in Ho Chi Minh City Vietnam in November 2022 This volume contains 60 peer reviewed papers selected for poster presentation from 406 submissions Papers included in this volume cover the following topics data mining and machine learning methods advanced data mining techniques and applications intelligent and contextual systems natural language processing network systems and applications computational imaging and vision decision support and control systems and data modeling and processing for industry 4 0 **Shared responses and individual differences in the human brain during naturalistic stimulations** Zhishan Hu,Xin Di,Zhi Yang,2023-06-02 **The Mathematics Curriculum, 9-12** Donald L. Chambers,1980 **Teaching, Tasks, and Trust** John Brehm,Scott Gates,2008-06-20 The mere word bureaucracy brings to mind images of endless lines piles of paperwork and frustrating battles over rules and red tape But some bureaucracies are clearly more efficient and responsive than others Why In Teaching Tasks and Trust distinguished political scientists John Brehm and Scott Gates show that a good part of the answer may be found in the roles that middle managers play in teaching and supporting the front line employees who make a bureaucracy work Brehm and Gates employ a range of sophisticated modeling and statistical methods in their analysis of employees in federal agencies police departments and social service centers Looking directly at what front line workers say about their supervisors they find that employees who feel they have received adequate training have a clearer understanding of the agency s mission which leads to improved efficiency within their departments Quality training translates to trust employees who feel supported and well trained for the job are more likely to trust their supervisors than

those who report being subject to constant monitoring and a strict hierarchy Managers who stand up for employees to media government and other agency officials are particularly effective in cultivating the trust of their workers And trust the authors find motivates superior job performance and commitment to the agency s mission Employees who trust their supervisors report that they work harder put in longer hours and are less likely to break rules The authors extend these findings to show that once supervisors gain trust they enjoy greater latitude in influencing how employees allocate their time while working Brehm and Gates show how these three executive roles are interrelated training and protection for employees gives rise to trust which provides supervisors with the leverage to stimulate improved performance among their workers This new model which frames supervisors as teachers and protectors instead of taskmasters has widespread implications for training a new generation of leaders and creating more efficient organizations Bureaucracies are notorious for inefficiency but mid level supervisors who are often regarded as powerless retain tremendous power to build a more productive workforce Teaching Tasks and Trust provides a fascinating glimpse into a bureaucratic world operating below the radar of the public eye a world we rarely see while waiting in line or filling out paperwork A Volume in the Russell Sage Foundation Series on Trust
