

Understanding Allergies

What Is An Allergy?

An allergy is an abnormal reaction of the body to a substance that is usually harmless. The reaction is caused by the immune system, which is designed to protect the body from harmful substances.

When the immune system reacts to a substance, it produces antibodies that attack the substance. This can cause a variety of symptoms, including sneezing, itching, and swelling.

Allergies can be caused by a variety of substances, including pollen, dust, mold, and certain foods.

Some allergies are more severe than others, and some can be life-threatening.

It is important to see a doctor if you suspect you have an allergy.

There are many treatments for allergies, including medications and allergy shots.

Understanding allergies can help you manage your symptoms and live a healthier life.
