Ancestral Appetites Food In Prehistory:

Ancestral Appetites Kristen J. Gremillion, 2011-03-14 This book explores the relationship between prehistoric people and their food what they ate why they ate it and how researchers have pieced together the story of past foodways from material traces Contemporary human food traditions encompass a seemingly infinite variety but all are essentially strategies for meeting basic nutritional needs developed over millions of years Humans are designed by evolution to adjust our feeding behaviour and food technology to meet the demands of a wide range of environments through a combination of social and experiential learning In this book Kristen J Gremillion demonstrates how these evolutionary processes have shaped the diversification of human diet over several million years of prehistory She draws on evidence extracted from the material remains that provide the only direct evidence of how people procured prepared presented and consumed food in prehistoric times

Tuckaleechee Cove Boyce N. Driskell,Robert J. Norrell,2024-01-12 Nestled amid the western slopes of the Great Smoky Mountains in East Tennessee bisected by the Little River and including the community of Townsend Tuckaleechee Cove is known today as the peaceful side of the Smokies Celebrated for its natural beauty the area is also the site of human habitation dating back at least 13 000 years Tuckaleechee Cove s rich past emerged from years of archaeological and historical research that began in 1999 when a state highway project uncovered a wealth of Native American and Euro American remains including burial mounds fragments of tools weapons cooking vessels and other evidence of past activity This bountifully illustrated book combines details from that study with fascinating bits of history to tell the story of the cove and its disparate peoples The earliest Native Americans to visit the area were hunters and foragers who moved in small bands through the cove setting up temporary camps Over the millennia

foraging gave way to more settled farming practices with the establishment of permanent settlements about 2 000 years ago By the 1600s the area s residents were Cherokees who would soon encounter European explorers and traders Displacing the Cherokees Euro Americans formed a number of small communities in the cove with colorful names like Frog Town and Needmore They farmed the land built churches schools and small businesses and fought in the Civil War In 1900 a northern investor named W B Townsend recognized the area s potential as a source of timber and two years later the town bearing his name was literally abuzz with sawmill activity By the Great Depression however the mills had closed bringing hardship to cove residents A measure of relief came in 1934 when the Great Smoky Mountains National Park was established nearby opening a new still unfolding chapter in the area s history Boyce N Driskell is the past director of the Archaeological Research Laboratory and adjunct research professor in the Department of Anthropology at the University of Tennessee Knoxville Robert J Norrell is a professor and the Bernadotte Schmidt Chair of Excellence in the Department of History at the University of Tennessee Knoxville

Ancient Ocean Crossings Stephen C. Jett,2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth s two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete

evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development
