9 Areas and Perimeters

This is is our next key Geometry unit. In it we will recap some of the concepts we have met before. We will also begin to develop a more algebraic approach to finding areas and perimeters.

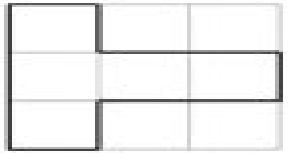
9.1 Area

The easiest method to find an area of a shape, particularly if it is a simple shape made up of straight lines, is to count the squares inside it.

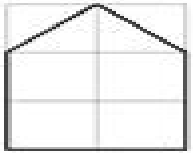
Example 1

Find the area of each of these shapes in terms of the square shown.

(a)



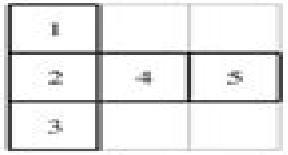
(b)



One square

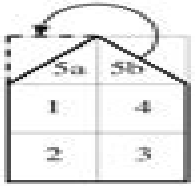
Solution

(a)



This can be divided into 5 of the squares, so its area is 5 square units.

(b)



We have 4 squares (labelled 1, 2, 3 and 4), and the two triangles (labelled 5a and 5b) can be joined together to form another square. So, in total, we have an area of 5 square units.
