

APPLIANCES

The appliances installed in your motor home are tested by independent laboratories and comply with rigid standards established by these organizations. All appliances installed by the manufacturer in your motor home are covered under Fleetwood's Ownercare Warranty program. Each appliance is also warranted by its manufacturer, and a warranty registration card for each appliance is included in your Owner's Information Package. Fill out the designated portions of the cards and mail them to the respective appliance manufacturers. Please consult the manufacturer's instructions for additional detailed information.

WARNING: THE WATER HEATER AND FURNACE COMBUSTION AIR EXHAUST PORTS MAY BE EXTREMELY HOT DURING WATER HEATER AND FURNACE OPERATION. DO NOT TOUCH THESE OUTLETS OR ALLOW ANY MATERIAL TO COME IN CONTACT WITH OR COVER EITHER THE AIR INTAKE OR EXHAUST PORTS WHILE OPERATING THE WATER HEATER AND/OR FURNACE.

WATER HEATER

The water heater operates on LP gas, and is much like the one in your home. It contains an automatic shut off valve which stops the gas supply if the water temperature rises too high. The water heater is reached through an access panel on the outside of the motor home. **CAUTION: DO NOT LIGHT WATER HEATER UNTIL IT IS FILLED WITH WATER.** Turn on the hot water faucet at the galley sink. If water flows continuously, the heater is full. For detailed operating instructions, refer to the manufacturer's instruction manual.

Occasionally you may experience "weeping" of the pressure/temperature relief valve on the water heater. This is not a defect. It is caused by the normal expansion of water while it is being heated in the closed water system of your motor home. The water heater tank is designed internally with an air gap at the top of the tank to reduce this weeping phenomenon. In time, though, the heating and expansion of the water will absorb this air. To replace the air, and reduce relief valve weeping:

- Turn off the water heater.
- Turn off incoming water supply.
- Open a faucet in the motor home.
- Pull the handle of the relief valve straight out and let water flow until it stops.
- Release the relief valve handle and let the valve snap shut.
- Turn on the water supply.

- Close the faucet when water flows continuously without sputtering.
- Turn on the water heater.

Water Heater

Water Heater Bypass System

A water heater bypass system may be installed on your water heater. See the Winterization section of this manual.

FURNACE

The furnace is a forced-air unit fueled by LP gas. All furnaces are equipped with a wall thermostat for individual temperature settings. The operating manual included in your Owner's Information Package contains detailed operating and maintenance instructions.

WARNING: PORTABLE FUEL-BURNING APPLIANCES ARE NOT SAFE FOR HEATING INSIDE THE MOTOR HOME. ASPHYXIAION OR CARBON MONOXIDE POISONING CAN OCCUR.

RANGE

The gas oven and burners are operated with LP gas. The basic operation is the same as the range in your home. For additional information, please refer to the operating manual in your Owner's Information Package.

A warning label has been located in the cooking area to remind you to provide an adequate supply of fresh air for combustion. Unlike homes, the amount of oxygen is limited in an RV due to the size and construction of the vehicle. Proper ventilation when using the cooking appliances will prevent the dangers of asphyxiation. **WARNING: DO NOT USE OPEN FLAMES TO WARM THE LIVING AREA. GAS COMBUSTION CONSUMES THE OXYGEN INSIDE THE MOTOR HOME.**
