burden of global climate change and sucking away resources much better applied to pressing societal needs Reduce reuse recycle is seldom evoked in the housing world where economists predict financial disasters when new housing starts decline and the idea of renovating inner city residences is regarded as merely a good cause Presenting irrefutable evidence this book cries out for America and the world to intervene by making simple changes in our household energy and water usage and by supporting municipal state national and international policies to counter this devastation and overuse of resources It offers a way out of the mess we are creating and envisions a future where we all live comfortable nondestructive lives The housing bomb is ticking and our choice is clear change our approach or feel the blast **YCC Handbook** Youth Conservation Corps (U.S.),1981
