Narrative Persuasion. A Cognitive Perspective on Language Evolution Francesco Ferretti, 2022-08-23 This book explores the evolutionary and cognitive foundations of human communication focusing on narrative as its distinctive dimension Within a framework of continuity with both the communication of our hominin predecessors and that of non human animals the book is about a twofold proposal It includes the idea that human and animal communication has an intrinsically persuasive nature along with the hypothesis that humans developed narrative forms of communication in order to enhance their persuasive abilities In this view narrative persuasion becomes the feature that distinguishes human communication from animal communication The study of the transition from

animal communication to language addresses both the selective pressures that led communication for persuasive purposes to take a narrative form and the cognitive architectures and expressive systems that enabled our ancestors to cope with the selective pressures of persuasive narrative based communication Language evolution is interdisciplinary even from the specific perspective of evolutionary pragmatics chosen here Therefore this book is intended for researchers working in fields such as cognitive sciences philosophy evolutionary biology cognitive psychology and primatology It also represents a valuable resource for advanced students in cognitive sciences linguistics and philosophy
