

EXAMPLE 3

Geometric Figure Application
 The graph shows the water level in a reservoir at different times. Find the slope of the line representing the water level.

Slope of the line

$$m = \frac{y_2 - y_1}{x_2 - x_1}$$

$$= \frac{100 - 0}{20 - 0}$$

$$= \frac{100}{20}$$

$$= 5$$

Step 2 Find the slope of the line.

The reservoir is a rectangle. The water level is represented by the line. The water level is 100 feet at 20 hours. The water level is 0 feet at 0 hours. The slope of the line is 5.

Step 3 The slope of the line is 5. The line is represented by the equation $y = 5x$.

To find the slope of the line, you can use the formula $m = \frac{y_2 - y_1}{x_2 - x_1}$. The line passes through the points (0, 0) and (20, 100).

EXAMPLE 4

Finding Slope from an Equation

Find the slope of the line described by $4x - 3y = 36$.

Step 1 Write the equation in slope-intercept form.

$$4x - 3y = 36$$

$$-3y = -4x + 36$$

$$y = \frac{4}{3}x - 12$$

Step 2 Find the y-intercept.

$$4x - 3y = 36$$

$$-3y = -4x + 36$$

$$y = \frac{4}{3}x - 12$$

Step 3 The line passes through (0, -12) and (9, 0). Use the slope formula.

$$m = \frac{y_2 - y_1}{x_2 - x_1} = \frac{0 - (-12)}{9 - 0} = \frac{12}{9} = \frac{4}{3}$$

Step 4 The slope of the line described by $4x - 3y = 36$ is $\frac{4}{3}$.

THINK AND DISCUSS

- The slope of a line is the difference of the y -coordinates divided by the difference of the x -coordinates. Are any two points on the line?
- Two points on a line define a unique line. If you know the slope of a line, can you find the equation of the line? Justify your answer.
- GET ORGANIZED** Copy and complete the graphic organizer. In each box, show the line in that box using the given equation.

Writing Equations

- Line 1: $y = 2x + 3$
- Line 2: $y = -x + 4$
- Line 3: $y = 3x - 1$

- (1, 3) and (2, 5)
- (-2, 7) and (3, 1)
- (-1, -1) and (2, -4)

Each graph below shows a linear relationship. Find the slope.

2	29
3	31

Find the slope of each line. Then tell what the slope represents.

Find the slope of the line described by each equation.

How Students Think When Doing Algebra

Steve Rhine,Rachel Harrington,Colin Starr,2018-11-01 Algebra is the gateway to college and careers yet it functions as the eye of the needle because of low pass rates for the middle school high school course and students struggles to understand We have forty years of research that discusses the ways students think and their cognitive challenges as they engage with algebra This book is a response to the National Council of Teachers of Mathematics NCTM call to better link research and practice by capturing what we have learned about students algebraic thinking in a way that is usable by teachers as they prepare lessons or reflect on their experiences in the classroom Through a Fund for the Improvement of Post Secondary Education FIPSE grant 17 teachers and mathematics educators read through the past 40 years of research on students algebraic thinking to capture what might be useful information for teachers to know over 1000 articles altogether The resulting five domains addressed in the book Variables Peterson Leatham 2009 The purpose of this book is to accelerate early career teachers experience with how students think when doing algebra in middle or high school as well as to supplement veteran teachers knowledge of content and students The research that this book is based upon can provide teachers with insight into the nature of a student s struggles with particular algebraic ideas to help teachers identify patterns that imply underlying thinking Our book How Students Think When Doing Algebra is not intended to be a how to book for teachers Instead it is intended to orient new teachers to the ways students think and be a book that teachers at all points in their career continually pull of the shelf when they wonder how might my students struggle with this algebraic concept I am about to teach The primary audience for this book is early career mathematics teachers who don t have extensive experience working with students engaged in mathematics However the book can also be useful to veteran teachers to supplement their knowledge and is an ideal resource for mathematics educators who are preparing preservice teachers

refocusing of their priorities and a total restructuring of their relationship with the federal government In the process he dismantles many of the common myths and talking points that are often heard by those who want to protect the status quo Critics of the current system are just teacher bashers Teachers unions put kids first Homeschooled kids suffer both academically and socially local control is an excuse to protect mediocrity Common Core is rigorous and state led Critics of Common Core are just conspiracy theorists Elementary school teachers need tenure We can't reform schools until we eradicate poverty school choice takes money away from public schools Charter schools perform poorly relative to public schools There is no issue more important to America's future than education The fact that we've yielded control over it to powerful unions and ideologically driven elitists is inexcusable We are failing ourselves our children and our country Conform gives parents the facts they need to take back the debate and help usher in a new era of education built around the commonsense principles of choice freedom and accountability
