Algebraic and Logic Programming Helene Kirchner, Giorgio Levi, 1992-08-19 This volume contains the proceedings of the Third International Conference on Algebraic and Logic Programming held in Pisa Italy September 2 4 1992 Like the two previous conferences in Germany in 1988 and France in 1990 the third conference aims at strengthening the connections between algebraic techniques and logic programming On the one hand logic programming has been very successful during the last decades and more and more systems compete in enhancing its expressive power On the other hand

concepts like functions equality theory and modularity are particularly well handled in an algebraic framework Common foundations of both approaches have recently been developed and this conference is a forum for people from both areas to exchange ideas results and experiences The book covers the following topics semantics of algebraic and logic programming integration of functional and logic programming term rewriting narrowing and resolution constraint logic programming and theorem proving concurrent features in algebraic and logic programming languages and implementation issues
