Nature Unbound Randy T Simmons, Ryan M. Yonk, Kenneth J. Sim, 2016-03-01 What if what we think we know about ecology and environmental policy is just wrong What if environmental laws often make things worse What if the very idea of nature has been hijacked by politics What if wilderness is something we create in our minds as opposed to being an actual description of nature In 1934 former U S Forest Service official Aldo Leopold a godfather to the modern environmental movement wrote that restrictive laws had largely failed in their mission to conserve America s forests rivers and other natural resources Less than forty years later however as various events pushed environmental concerns into the public spotlight lawmakers from both parties championed legislation far more sweeping and restrictive than any Leopold had witnessed How well did these restrictive laws work to right environmental wrongs Why did so many miss the mark And how should we go about improving our policies In *Nature Unbound* authors Randy Simmons Ryan M Yonk and Kenneth J Sim offer a devastating critique of federal environmental policy by scrutinizing it through the lenses of biological ecology and political ecology This powerful framework they show reveals that environmental policy has been guided since the late 1960s by demonstrably false assumptions responsible for a host of ineffective or wasteful command and control policies on air pollution water pollution endangered species wilderness renewable energy and more The mistakes have also empowered political entrepreneurship in ways that have encroached on property rights burdened the general public and degraded the

civic landscape More than a critique of false assumptions and flawed policies Nature Unbound offers bold principles to help us rethink environmental objectives align incentives with goals and affirm the notion that human beings are an integral part of the natural order and merit no less consideration than Earth's other treasures Ultimately nothing less can succeed in our efforts to restore natural resources and revitalize our social and political ecosystem Cape Coral Burrowing Owls Don't

Rozelle, 2016-11-08 A study of the natural world as imagined by contemporary writers specifically their portrayals of nature as monster In *Zombiescapes and Phantom Zones* Ecocriticism and the Liminal from Invisible Man to The Walking Dead Lee Rozelle chronicles the weirdest ugliest and most mixed up characters to appear on the literary scene since World War II creatures intimately linked to damaged habitats that rise from the muck not to destroy or rule the world but to save it The book asks what happens to these landscapes after the madness havoc and destruction What monsters and magic surface then Rozelle argues that zombiescapes and phantom zones depicted in the book become catalysts for environmental reanimation and sources of hope Liminality offers exciting and useful new ways to conceptualize places that have historically proven troublesome unwieldy or hard to define Zombiescapes can reduce the effects of pollution promote environmental justice lessen economic disparity and localize food production The grotesques that ooze and crawl from these passages challenge readers to consider new ways to re-inhabit broken lands at a time when energy efficiency fracking climate change the Pacific trade agreement local food production and sustainability shape the intellectual landscape Rozelle focuses on literary works from 1950 to 2015 the zombiescapes and monsterscapes of post World War II literature that portray in troubling and often devastating ways the brownfields that have been divested of much of their biodiversity and ecological viability However he also highlights how these literary works suggest a new life and new potential for such environments With an unlikely focus on places of ruination and an application of interdisciplinary transnational approaches to a range of fields and texts Rozelle advances the notion that places of distortion might become a nexus where revelation and advocacy are possible again *Zombiescapes and Phantom Zones* has much to offer to various fields of scholarship including literary studies ecocriticism and environmental studies Research academic and undergraduate audiences will be captivated by Rozelle's lively prose and unique anthropological ecocritical and literary analyses **Preserving the Living Earth** Christine Petersen, 2012-01-15
