For a rectangular shape such as a display screen, the longer side is called the width (W) and the shorter side is the height (H). The aspect ratio is W:H or WH.

1. What is the approximate aspect ratio of the screen on your graphing calculator? Consider only the window, not the entire screen.

The size of a television is the length of the diagonal of its screen in inches. The aspect ratio of the screens of older televisions is 4:3, while the aspect ratio of newer wide-screen televisions is 16:9.

2. Find the width and height of an older 25-inch television whose screen has an aspect ratio of 4:3.

Find the area of this screen.
