in martial applications Peter Lim wrote two chapters In one he details general taiji principles that are put into the practice while in the other chapter he looks specifically at how the principles can be applied in combat His chapters provide a solid foundation for better understanding tuishou the two person push hands practice that Herman Kaus and Hal Mosher with the help of Allen Pittman discuss Greg Wolfson with the help of Scott Rodell writes about push hands and sanshou a high level two person practice of combative training Russ Mason s short but pertinent chapter samples two favorite techniques wardoff and diagonal flying The chapters by Donald Mainfort and Joel Stein are relatively unique in that they look at the variety of taiji forms contrasting the original Chen Style with the Yang Style and the large and medium frames helping us better understand how and why routines differ and which may be better suited for particular individuals As a result we can also see why movements from different styles can blend into anyone s practice Comprised of articles previously published in the Journal of Asian Martial Arts we are highly optimistic that you will find something on each page of this anthology to be of great use in your understanding and practice
