The Algebra Miracle: The True Story of a High-Poverty School's Triumph in the Age of Accountability Stuart Alan Singer, 2012-02-21 A miracle is defined as a highly improbable or extraordinary accomplishment The story of the Algebra program at JEB Stuart High School in Fairfax Virginia qualifies for such a designation Over a period of fifteen years a series of ambitious no cost innovations which challenged the prevailing status quo in math education led to a set of academic accomplishments that were indeed improbable and extraordinary This miracle was achieved by a high poverty ethnically diverse student body that was unique at the time but is now representative of schools found throughout the U S For everyone touched by education from parents and students to teachers and administrators The Algebra Miracle will provide insights into the complexity of finding a low cost formula for academic success in the tight budgetary times of the 21st century This story serves as a model of what can be accomplished when a dedicated school staff commits its time energy and creativity to the needs of their students

Algebra and Analysis for Engineers and Scientists Anthony N. Michel, Charles J. Herget, 2009-12-24 This book evolved from a one year sequence of courses offered by the authors at Iowa State University The audience for this book typically included theoretically oriented first or second year graduate students in various engineering or science disciplines Subsequently while serving as Chair of the Department of Electrical Engineering and later as Dean of the College of Engineering at the University of Notre Dame the first author continued using this book in courses aimed primarily at graduate students in control systems Since administrative demands precluded the possibility of regularly scheduled classes the Socratic method was used in guiding students in self study This method of course delivery turned out to be very effective and satisfying to student and teacher alike Feedback from colleagues and students suggests that this book has been used in a similar manner elsewhere The original objectives in writing this book were to provide the reader with appropriate mathematical background for graduate study in engineering or science to provide the reader with appropriate prerequisites for more advanced subjects in mathematics to allow the student in engineering or science to become familiar with a great deal of pertinent mathematics in a rapid and efficient manner without sacrificing rigor to give the reader a unified overview of applicable mathematics thus enabling him or her to choose additional courses in mathematics more intelligently and to make it possible for the student to understand

Algebra Serge Lang, 2012-12-06 From April 1999 Notices of the AMS announcing that the author was awarded the Leroy P Steele Prize for Mathematical Exposition for his many mathematics books Lang's Algebra changed the way graduate algebra is taught retaining classical topics but introducing language and ways of thinking from category theory and homological algebra It has affected all subsequent graduate level algebra books From MathSciNet's review of the first edition The author has an impressive knack for presenting the important and interesting ideas of algebra in just the right way and he never gets bogged down in the dry formalism which pervades some parts of algebra This book is intended as a basic text for a one year course in Algebra at the

graduate level or as a useful reference for mathematicians and professionals who use higher level algebra This book successfully addresses all of the basic concepts of algebra For the new edition the author has added exercises and made numerous corrections to the text *Correspondence Courses Offered by Colleges and Universities Through the United States Armed Forces Institute* United States Armed Forces Institute,1951 *Algebraic and Logic Programming* Jan Grabowski,Pierre Lescanne,Wolfgang Wechler,1989-07-04 This volume contains the proceedings of the First International Workshop on Algebraic and Logic Programming held in Gaussig German Democratic Republic from November 14 to 18 1988 The workshop was devoted to Algebraic Programming in the sense of programming by algebraic specifications and rewrite rule systems and Logic Programming in the sense of Horn clause specifications and resolution systems This includes combined algebraic logic programming systems mutual relations and mutual implementation of programming paradigms completeness and efficiency considerations in both fields as well as related topics Fundamentals of Algebraic Specification 2 Hartmut Ehrig,Bernd Mahr,1989-12-28 Since the early seventies concepts of specification have become central in the whole area of computer science Especially algebraic specification techniques for abstract data types and software systems have gained considerable importance in recent years They have not only played a central role in the theory of data type specification but meanwhile have had a remarkable influence on programming language design system architectures and software tools and environments The fundamentals of algebraic specification lay a basis for teaching research and development in all those fields of computer science where algebraic techniques are the subject or are used with advantage on a conceptual level Such a basis however we do not regard to be a synopsis of all the different approaches and achievements but rather a consistently developed theory Such a theory should mainly emphasize elaboration of basic concepts from one point of view and in a rigorous way reach the state of the art in the field We understand fundamentals in this context as 1 Fundamentals in the sense of a carefully motivated introduction to algebraic specification which is understandable for computer scientists and mathematicians 2 Fundamentals in the sense of mathematical theories which are the basis for precise definitions constructions results and correctness proofs 3 Fundamentals in the sense of concepts from computer science which are introduced on a conceptual level and formalized in mathematical terms **Correspondence Courses Offered by Colleges and Universities Through the United States Armed Forces Institute ,1957**
