Eye Representation and Ocular Terminology from Antiquity to Helmholtz D. Raynaud, 2020-08-25 Arab Painting Anna Contadini, 2010 Arab painting preserved mainly in manuscript illustrations of the 12th to 14th centuries is here treated as an artistic corpus fully deserving of appreciation in its own terms and not as a mere precursor to Persian painting The book assembles papers by a distinguished list of scholars that illuminate the variety of material that survives in scientific as well as literary manuscripts Because of the contexts in which the paintings appear a major theoretical concern is precisely the relationship of painting to text It rejects earlier scholarly habits of analysing paintings in isolation and proposes the integration of text and image as a more satisfactory framework within which to elucidate the characteristics and functions of this impressive body of work This second revised edition includes addenda and corrigenda *A Natural History of Vision* Nicholas J. Wade, 2000-01-31 This illustrated survey covers what Nicholas Wade calls the observational era of vision beginning with the Greek philosophers and ending with Wheatstone's description of the stereoscope in the late 1830s
