6).

A marble rolling on a horizontal surface encounters an incline and rolls up it without skidding until it comes to a stop. Then it rolls back down again, also without skidding. The force on the marble due to its interaction with the incline has two components—one perpendicular to the incline (the normal force) and one parallel to the incline (a frictional force). The frictional force on the marble is directed

Mediation John Michael Haynes, Gretchen L. Haynes, Larry Sun Fong, 2012-02-01 This mediation how to manual brings together the collective wisdom of two of the field's most renowned founders John Michael Haynes and Larry Sun Fong. The book not only covers a range of mediation cases but also uniquely provides feedback from the clients as they reflect on the sessions and report on what worked best for them. Beginning with a review of the theoretical underpinnings of the Haynes model of mediation, the book then presents six case studies, each demonstrating one or more of the organizing principles of mediation. The sessions examined reflect the different mediation areas currently being practiced: business, employment, neighborhood, adoption, education, and family. The book goes beyond simply reporting what mediators experience; it shares the insights and motivations of Fong and Haynes. This well-rounded approach includes the exploration of the clients' thoughts, helping readers to incorporate successful organizing principles into their own mediation practices.
