China's Foreign Policy and Practice Wenguang Shao, 2022-12-21 This book is one of the first wide-ranging surveys of China's foreign policy and practice from the 16th century to the present day from a Chinese perspective. A modern history of China's interaction with major powers, it throws new light on the events and issues of major interest, clarifies possible points of ambiguity and misunderstanding, and brings the reader up to date about some of the current issues of contention in China's international relations. *China Foreign Policy and Practice* Presents a unique account of Chinese statecraft and foreign policy from the vantage point of an insider who has spent years participating in the decision-making process at the national level. Paints a larger picture of China's interaction with the world, connecting wars, negotiations, treaties, and boundary settlements with its neighbours. Focuses on policy evolution in specific areas such as trade, regional diplomacy, dispute settlement, crisis management, and engagement with major powers. Draws on Chinese records and publications that may not be readily accessible, as well as the latest memoirs and declassified documents. Is a nuanced, comprehensive and accessible guide for students of international politics as well as general readers interested in China. A unique history of China in world affairs; this book will be essential reading for students of politics and international relations, history, foreign policy, diplomacy, China studies, and Asian studies.

Advances and controversies in ischemic stroke management: from prevention to diagnosis and acute treatment Matteo Foschi, Raffaele Ornello, Lucio D'Anna, Giovanni Merlino, 2025-09-25 Stroke is a leading cause of mortality and the primary cause of disability worldwide, with ischemic stroke accounting for approximately 70% of all cases globally. Recent advancements in brain imaging techniques have significantly expanded the treatment window for reperfusion therapies in carefully selected patients, resulting in improved functional outcomes in the short and long term. Intravenous thrombolysis (IVT) has proven effective in reducing disability when administered for up to 9 hours in patients with detectable salvageable brain tissue on perfusion imaging. Endovascular thrombectomy (EVT) has emerged as a beneficial intervention for a wide range of patients with large vessel occlusion, even up to 24 hours after stroke onset, provided appropriate patient selection based on imaging criteria. Conversely, recent trials have demonstrated the superior efficacy of intensive

pharmacological approaches such as dual antiplatelet therapy DAPT in preventing ischemic stroke recurrence particularly in high risk patients Despite significant advancements several controversies persist in the field of ischemic stroke management These controversies encompass various topics including determining the optimal secondary prevention strategy for patients with patent foramen ovale or strategies for ischemic stroke prevention in patients with atrial fibrillation following intracerebral hemorrhage Furthermore ongoing debates exist regarding the actual effectiveness of EVT in patients with large ischemic core distal vessel occlusion mild stroke syndromes or high baseline disability Additionally the comparative utility of IVT versus dual antiplatelet therapy for minor ischemic strokes remains a contentious issue Moreover discussions revolve around identifying the optimal delivery paradigm for EVT such as the choice between the drip and ship approach versus the mothership model
