Library Trends, 1964 *Black Tax* Niq Mhlongo, 2019-09-12 The real significance of this book lies in the fact that it tells us more about the everyday life of black South Africans It delves into the essence of black family life and the secret anguish of family members who often battle to cope Niq Mhlongo A secret torment for some a proud responsibility for others black tax is a daily reality for thousands of black South Africans In this thought provoking and moving anthology a provocative range of voices share their deeply personal stories With the majority of black South Africans still living in poverty today many black middle class households are connected to working class or jobless homes Some believe supporting family members is an undeniable part of African culture and question whether it should even be labelled as a kind of tax Others point to the financial pressure it places on black students and professionals who as a consequence struggle to build their own wealth Many feel they are taking over what is essentially a government responsibility The contributions also investigate the historical roots of black tax the concept of the black family and the black middle class In giving voice to so many different perspectives *Black Tax* hopes to start a dialogue on this widespread social phenomenon *Cross-Cultural Neuropsychological Assessment* Victor Nell, 1999-11 A bk for all neuropsychologists who are called upon to assess culturally different clients Deals realistically with problem of lack of norms for many groups describes principles of behavioral

The Remnants of Race Science Sebastián

Gil-Riaño, 2023-08-29 After World War II UNESCO launched an ambitious international campaign against race prejudice Casting racism as a problem of ignorance it sought to reduce prejudice by spreading the latest scientific knowledge about human diversity to instill mutual understanding between groups of people This campaign has often been understood as a response led by British and U S scientists to the extreme ideas that informed Nazi Germany Yet many of its key figures were social scientists either raised in or closely involved with South America and the South Pacific The Remnants of Race Science traces the influence of ideas from the Global South on UNESCO s race campaign illuminating its relationship to notions of modernization and economic development Sebasti n Gil Ria o examines the campaign participants involvement in some of the most ambitious development projects of the postwar period In challenging race prejudice these experts drew on ideas about race that emphasized plasticity and mutability in contrast to the fixed categories of scientific racism Gil Ria o argues that these same ideas legitimated projects of economic development and social integration aimed at bringing ostensibly backward indigenous and non European peoples into the modern world He also shows how these experts promotion of studies of race relations inadvertently spurred a deeper reckoning with the structural and imperial sources of racism as well as the aftermath of the transatlantic slave trade Shedding new light on the postwar refashioning of ideas about race this book reveals how internationalist efforts to dismantle racism paved the way for postcolonial modernization projects
