borderlands in particular rested on overlapping sets of assumptions about space race and gender those same assumptions would be used to craft the policies that were supposed to turn national visions into local realities The growth of a white female population in the region which should have whitened and easternized the region merely served to complicate emerging categories Both governments worked hard to enforce the lines that were supposed to separate good land from bad whites from aboriginals different groups of newcomers from each other and women s roles from men s roles The lines and categories they depended on were used to distinguish each West and thus each nation from the other Drawing on a range of sources from government maps and reports to oral testimony and personal papers The Line Which Separates explores the uneven way in which the borderlands were superimposed on Blackfoot country in order to divide a previously cohesive region in the late nineteenth century Sessional Papers - Legislature of the Province of Ontario Ontario.
