Women and Photography in Apartheid South Africa Marie Meyerding, 2025-04-29 Tracing the lives and works of five women in four case studies author Marie Meyerding examines the representation of women in the field of photography in South Africa in the second half of the twentieth century All of them are critically understudied with no existing scholarship dedicated exclusively to their photographic contributions Focusing on the representation of women on two different levels as agents behind the camera and as subjects in photographs it showcases women photographers portraying their female contemporaries and analyses to what extent they adhered to or subverted common forms of gender representation In recuperating their forgotten archives the book argues that none of these women are marginal figures but rather that each of them played a leading role in the field of photography in their own time The book will be of interest to scholars working in art history history of photography gender studies intersectionality and African studies **Organise or Die?** Raphaël

Botiveau, 2017-12-01 The story of one of the leading trade unions in South Africa the National Union of Mineworkers and its role in the struggle against white minority rule Organise or Die Democracy and Leadership in South Africa s National Union of Mineworkers NUM is the first in depth study of one of the leading trade unions in the country Founded in 1982 the trade union played a key role in the struggle against white minority rule before turning into a central protagonist of the ruling Tripartite Alliance after apartheid Deftly navigating through workerist social movement and political terrains that shape the South African labour landscape this book sheds light on the path that led to the unprecedented 2012 Marikana massacre the dissolution of the Congress of South African Trade Unions Cosatu federation and to fractures within the African National Congress ANC itself Working with the notions of organisational agency and strategic bureaucratisation Raphaël Botiveau shows how the founding leadership of NUM built their union s structures with a view to mirror those of the multinational mining companies NUM faced Good leadership proved key to the union s success in recruiting and uniting mineworkers and NUM became an impressive school for union and political cadres producing a number of South Africa s top post apartheid leaders An incisive analysis of leadership styles and strategies shows how the fragile balance between an increasingly distant leadership and an increasingly militant membership gradually broke down Botiveau provides a compelling narrative of NUM s powerful history and the legacy of its leadership It will appeal to a broad readership including journalists students and social sciences scholars interested in South Africa s contemporary politics and labour history The Biopolitics of Water

Sofie Hellberg, 2018-03-28 Biopolitics refers to a form of politics concerned with administering and regulating the conditions of life at an aggregated level of populations This book provides a biopolitical perspective on water governance and its effects It draws on the work of Foucault to explore how notions of scarcity are used in strategies of governance and how such governance differentiates between different populations Furthermore the author investigates what such biopolitical regulation means for people s lifestyles and the way they understand themselves and their moral responsibilities as humans

individuals and citizens The book begins by investigating the global water agenda with a particular emphasis on its focus on water for basic needs and provides different examples of hydromentalities around the world It also presents rich empirical details of one local case in South Africa By carefully exploring the water stories of water users the book provides new perspectives on the relationship between water and power Additionally it offers an innovative methodological framework through which we can study the workings of governance more generally and water governance specifically It thereby contributes to the scholarship on water governance in relation to how water governance and technologies are part of producing subjectivities notions of life and lifestyles and more specifically how the global water agenda can work so as to produce or further entrench distinctions between different lives and lifestyles Ultimately such differences between individuals and populations that are produced as an effect of water governance are assessed in relation to social sustainability
