OECD Reviews of Innovation Policy: Finland 2017 OECD, 2017-06-09 Although Finland achieved a widely acclaimed transformation to become a leading knowledge based economy in the late 20th century the 2009 recession which led to Nokia's restructuring and the downsizing of traditional sectors

Sourcebook on the Foundations of Social Protection Delivery Systems Kathy Lindert, Tina George Karippacheril, Inés Rodríguez Caillava, Kenichi Nishikawa Chávez, 2020-10-29 The Sourcebook on the Foundations of Social Protection Delivery Systems synthesizes real world experiences and lessons learned of social protection delivery systems from around the globe It takes a broad view of social protection covering various intended populations such as poor or low income families unemployed workers persons with disabilities and individuals facing social risks It discusses many types of interventions that governments provide to individuals families or households including categorical programs poverty targeted programs labor benefits and services disability benefits and services and social services The Sourcebook seeks to address concrete how to questions including How do countries deliver social protection benefits and services How do they do so effectively and efficiently How do they ensure dynamic inclusion especially for the most vulnerable and needy How do they promote better coordination and integration not only among social protection programs but also among programs in other parts of government How can they meet the needs of their intended populations and provide a better client experience The delivery systems framework elaborates on the key elements of that

operating environment The framework is anchored in core implementation phases along the delivery chain Key actors including people and institutions interact all along that delivery chain Those interactions are facilitated by communications information systems and technology This framework can apply to the delivery of one or many programs and to the delivery of adaptive social protection The Sourcebook structures itself around eight key principles that can frame the delivery systems mind set 1 There is no single blueprint for delivery systems but there are commonalities and those common elements constitute the core of the delivery systems framework 2 Quality of implementation matters and weaknesses in any of the core elements will negatively affect the entire system reducing the impacts of the program s they support 3 Delivery systems evolve over time in a nonlinear fashion and their starting points matter 4 Efforts should be made to keep it simple and to do simple well from the start 5 The first mile people s direct interface with administrative functions is often the weakest link in the delivery chain improving it may take systemic change but will greatly improve overall efficiencies and mitigate the risk of failures on the frontlines 6 Social protection programs do not operate in a vacuum and thus their delivery systems should not be developed in silos synergies across institutions and information systems are possible and can improve program outcomes 7 Social protection delivery systems can contribute more broadly to government s ability to serve other sectors such as health insurance subsidies scholarships social energy tariffs housing benefits and legal services 8 The dual challenges of inclusion and coordination are pervasive and perennial and encourage the continuous improvement of delivery systems through a dynamic integrated and human centered approach

The impact of climate variability and extremes on agriculture and food security - An analysis of the evidence and case studies Food and Agriculture Organization of the United Nations ,2020-12-12 Global climate studies show that not only temperatures are increasing and precipitation levels are becoming more varied all projections indicate these trends will continue It is therefore imperative that we understand changes in climate over agricultural areas and their impacts on agriculture production and food security This study presents new analysis on the impact of changing climate on agriculture and food security by examining the evidence on recent climate variability and extremes over agricultural areas and the impact of these on agriculture and food security It shows that more countries are exposed to increasing climate variability and extremes and the frequency the number of years exposed in a five year period and intensity the number of types of climate extremes in a five year period of exposure over agricultural areas have increased The findings of this study are compelling and bring urgency to the fact that climate variability and extremes are proliferating and intensifying and are contributing to a rise in global hunger The world s 2.5 billion small scale farmers herders fishers and forest dependent people who derive their food and income from renewable natural resources are most at risk and affected Actions to strengthen the resilience of livelihoods and food systems to climate variability and extremes urgently need to be scaled up and accelerated

Emerging Markets and the State Christopher Wylde,2017-07-27 This book through an analysis of case studies in Latin America and Southeast Asia sets out to understand the form and function of

contemporary states seeking to guide and cajole markets hoping to stimulate economic growth and generate robust development outcomes In the context of contemporary globalization and the hegemony of a neoliberal mode of capital accumulation independent state directed development has moved away from the reach of many emerging markets Wylde s analysis reveals that contrary to much of the literature espousing the end of the state the role of the state in the 21st century development process continues to be of pivotal importance

Topics in Hydrometeorology Theodore Hromadka, Prasada Rao, 2019-05-29 The field of hydrometeorology bridges across both meteorology and hydrology In this book multiple experts present their work on various topics that fall under the purview of hydrometeorology The chapters will provide readers with some of the latest developments and applications across different regions of the world and will motivate the audience to investigate other areas in hydrometeorology

The Social Ontology of Capitalism Daniel Krier, Mark P. Worrell, 2016-11-25 This book addresses core questions about the nature and structure of contemporary capitalism and the social dynamics and countervailing forces that shape modern life From a robust and self consciously sociological framework it analyzes and interrogates such issues as the nature of the social the power of the sacred the nature of authority the problem of representation reification alienation utopia and collective resistance Historical materialism reveals that the scope of productive functions is broader than the crude realism of economism Marx s critical theory of the commodity and his analysis of the capitalist regime of accumulation remain as vital as ever and serve as a guiding light for the continued exploration of the philosophical underpinnings of critical inquiry and praxis

Changing Our Worlds Michelle LeBaron, Janis Sarra, 2018-07-03 Changing Our Worlds draws on the wisdom of African artists theorists educators and leaders It profiles an array of transformative arts projects that among other things changed attitudes and behaviours toward HIV testing and prevention helped rural citizens to design and build a new community centre and supported those with HIV AIDS to strengthen their resilience As a group of scholar practitioners collaborating on the book reinforced our confidence in the potency of arts practices to unsettle unjust orders inspire new visions and embrace the

Sustainability: Challenges in the Context of the SDGs and Covid-19 Recovery Andreas Antoniadou, Alexander S.

Antonarakis, Isabell Kempf, 2022-01-03 This volume advances the state of the art in the study of the interplay among financial crises poverty dynamics and environmental sustainability It offers timely and unique contributions to the immediate global challenge of sustainable development Developing a new evidence base the volume offers concrete recommendations for policy action needed in advancing the Sustainable Development Goals SDGs in relation to environment and poverty during the current conditions of financial distress The approach taken is inductive and evidence driven Most analysis is based on in depth case studies that aim to offer a detailed and dynamic picture on how poverty and environmental sustainability interact in specific social contexts and financial crises In this way the volume aims to generate a wealth of new and concrete evidence that offer a solid foundation to understand the multiple channels through which social and environmental factors interact and the ways in which this interaction can and should be managed in order to achieve the needed global transition to sustainability Broader dynamics that are covered and analysed include the historical legacies of structural adjustment and colonialism the current debt wave experienced in developing countries the role of inequality the significant impact that climate change has on livelihoods and on meeting the SDGs the new challenge presented by the Covid 19 pandemic for the SDGs the challenge of sustainable funding for SDGs and the need for a new eco social contract Case studies examined include Cambodia Ethiopia India Indonesia Zambia and subregions such as the Caribbean sub Saharan Africa and Lower Mekong Countries The volume is part of a joint initiative by the Sussex Sustainability Research Programme SSRP of the University of Sussex the UNDP UNEP Poverty Environment Action for Sustainable Development Goals and the United Nations Research Institute for Social Development UNRISD The overall aim is to advance a new research programme and foster a better understanding of the multiple complex and often opposing ways through which the punctuated economic slowdown of financial crises poverty dynamics and environmental sustainability interact It also makes novel recommendations into how poverty reduction and environment can work in synergy rather than being antagonistic especially during financial distress leading into recommendations directly geared towards achieving the SDGs and beyond

Employability via Higher Education: Sustainability as Scholarship Alice Diver, 2019-09-23 This book discusses the topic of graduate employability from the premise that in this era of massification economic austerity and political uncertainties higher education HE no longer guarantees a clear work place advantage Divided into three sections the book offers theoretical and philosophical discourses on the HE quandary whilst taking into account and critiquing political temporal and national contexts It culminates in an investigation into specific discipline areas It offers insights into the way that institutions decision makers academics and professional support staff can work together towards ensuring that our

graduates are able to cope with the varied demands and challenges of modern job markets It harnesses arguments and reflections on the breadth and depth of the functions of HE such as social transformation promoting principles of social justice and providing opportunities It grounds these in a triadic model for enhancing student engagement and holistic learning namely the emotional cognitive and behavioural aspects As an anthology it is forward gazing in terms of the sustainability debate whilst still offering evidence based research grounded practical suggestions to readers looking for tips and tools of the trade *Climate Change and Agricultural System Response* Dingde Xu,Qirui Li,Shaoquan Liu,Li

Peng,2022-10-07 **Water, Flood Management and Water Security Under a Changing Climate** Anisul Haque,Ahmed Ishtiaque Amin Chowdhury,2020-07-13 This book presents selected papers from the 7th International Conference on Water and Flood Management with a special focus on Water Security under Climate Change held in Dhaka Bangladesh in March 2019 The biennial conference is organized by Institute of Water and Flood Management of Bangladesh University of Engineering and Technology The recent decades have experienced more frequent natural calamities and it is believed that climate change is an important driving factor for such hazards Each part of the hydrological cycle is affected by global climate change Moreover increasing population and economic activities are posing a bigger threat to water sources To ensure sustainable livelihoods safeguard ecosystem services and enhance socio economic development water security needs to be investigated widely in a global and regional context **Deltas in the Anthropocene** Robert J. Nicholls,W. Neil Adger,Craig W. Hutton,Susan E. Hanson,2019-08-28 The Anthropocene is the human dominated modern era that has accelerated social environmental and climate change across the world in the last few decades This open access book examines the challenges the Anthropocene presents to the sustainable management of deltas both the many threats as well as the opportunities In the world s deltas the Anthropocene is manifest in major land use change the damming of rivers the engineering of coasts and the growth of some of the world s largest megacities deltas are home to one in twelve of all people in the world The book explores bio physical and social dynamics and makes clear adaptation choices and trade offs that underpin policy and governance processes including visionary delta management plans It details new analysis to illustrate these challenges based on three significant and contrasting deltas the Ganges Brahmaputra Meghna Mahanadi and Volta This multi disciplinary policy orientated volume is strongly aligned to the United Nation s Sustainable Development Goals as delta populations often experience extremes of poverty gender and structural inequality variable levels of health and well being while being vulnerable to extreme and systematic climate change *Responsible Production and Consumption* Pramod K. Mishra,Sameer Prasad,B. Kamaiah,B. Raja Shekhar,Chinmaya Behera,Pratap K. Jena,2024-11-25 Zero Hunger SDG 2 and Responsible Consumption and Production SDG 12 of the United Nations are very crucial aspects for any economy in the world In terms of Agricultural Sustainability and Food Security the world should see to it that agriculture is sustainable enough to ensure food security for all its people While nobody should be deprived of food for whatever reasons

and at the same time nobody should use the agricultural resources both inputs and outputs in a manner harmful to the society at large The use of any resources in terms of production and consumption and vice versa should take into account the carbon footprint and greenhouse gas emissions While the producers have a major role in the optimum use of the resources the consumers for whatever items should take into account the responsible consumption practices Since production and consumption are like two sides of a coin complementary to each other any change in one of the aspects will have its repercussions on the other one So it is a collective responsibility of everyone to ensure that things are practiced the way they are supposed to
