Mitchell,2024-06-06 Some of humanity s earliest ancestors lived in southern Africa and evidence from sites there has inspired key debates on human origins and the emergence of complex cognition Building on its rich rock art heritage archaeologists have developed theoretical work that continues to influence rock art studies worldwide with the relationship between archaeological and anthropological data central to understanding past hunter gatherer pastoralist and farmer communities alike New work on pre colonial states contests models that previously explained their emergence via external trade while the transformations wrought by European colonialism are being rewritten to emphasise Indigenous agency feeding into efforts to decolonise the discipline itself Inhabited by humans longer than almost anywhere else and with an unusually varied complex past southern Africa thus has much to contribute to archaeology worldwide In this revised and updated edition Peter Mitchell provides a comprehensive and extensively illustrated synthesis of its archaeology over more than three million years **The WTO and Food Security** Sachin Kumar Sharma,2016-09-28 This book examines the public stockholding policies of selected developing countries from the perspective of WTO rules and assesses whether the provisions of the Agreement on Agriculture AoA could hamper these countries efforts to address the challenges of food security Further it highlights the need to amend the provisions of the AoA to make WTO rules just and fair for the millions of people suffering from hunger and

African Handbook of Climate Change Adaptation Nicholas Oguge, Desalegn Ayal, Lydia Adeleke, Izael da Silva, 2021-05-20 This open access book discusses current thinking and presents the main issues and challenges associated with climate change in Africa It introduces evidences from studies and projects which show how climate change adaptation is being and may continue to be successfully implemented in African countries Thanks to its scope and wide range of themes surrounding climate change the ambition is that this book will be a lead publication on the topic which may be regularly updated and hence capture further works Climate change is a major global challenge However some geographical regions are more severely affected than others One of these regions is the African continent Due to a combination of unfavourable socio economic and meteorological conditions African countries are particularly vulnerable to climate change and its impacts The recently released IPCC special report Global Warming of 1.5°C outlines the fact that keeping global warming by the level of 1.5°C is possible but also suggested that an increase by 2.0°C could lead to crises with crops agriculture fed by rain could drop by 50% in some African countries by 2020 and livestock production could damage water supplies and pose an additional threat to coastal areas The 5th Assessment Report produced by IPCC predicts that wheat may disappear from Africa by 2080 and that maize a staple will fall significantly in southern Africa Also arid and semi arid lands are likely to increase by up to 8% with severe ramifications for livelihoods poverty eradication and meeting the SDGs Pursuing appropriate adaptation strategies is thus vital in order to address the current and future challenges posed by a changing climate It is against this background that the African Handbook of Climate Change Adaptation is being published It contains papers prepared by scholars representatives from social movements practitioners and members of governmental agencies undertaking research and or executing climate change projects in Africa and working with communities across the African continent Encompassing over 100 contributions from across Africa it is the most comprehensive publication on climate change adaptation in Africa ever produced

African Perspectives on Poverty, Indigenous Knowledge Systems, and Innovation Oliver Mtshali, 2022-11-15 This book examines the connections between poverty and innovation in Africa Through case studies and theorizations from a distinctly African perspective it stands in contrast to current theoretical works in the field which remain very much rooted in Western orientated thinking The book investigates the application of methodologies which explain numerous African contexts in connection with issues of poverty and inequality It reflects on comparative practices and praxes

on the African continent including commonplace traditions and practices in alleviating poverty taken against a background of the failure of current prescriptions for poverty alleviation such as the Structural Adjustment Programmes SAPs and the Poverty Reduction Strategy Papers PRSP There is a dire need for new practical perspectives which move Africa forward using its indigenous knowledge Owing to a general lack of recorded African theories and methodologies on poverty inequality and innovation this book represents a pioneering corpus of African knowledge addressing poverty and inequality through local innovations Adopting a transdisciplinary approach it is relevant to students and scholars in development studies and economics African studies social studies political history and political economy climate studies anthropology and geography
