Answer Sheet Washington Post:

The Testing Charade Daniel Koretz, 2017-08-31 For decades we've been studying, experimenting with, and wrangling over different approaches to improving public education and there's still little consensus on what works and what to do. The one thing people seem to agree on, however, is that schools need to be held accountable; we need to know whether what they're doing is actually working. But what does that mean in practice? High stakes tests. Lots of them. And that has become a major problem. Daniel Koretz, one of the nation's foremost experts on educational testing, argues in *The Testing Charade* that the whole idea of test-based accountability has failed; it has increasingly become an end in itself, harming students and corrupting the very ideals of teaching. In this powerful polemic, built on unimpeachable evidence and rooted in decades of experience with educational testing, Koretz calls out high stakes testing as a sham, a false idol that is ripe for manipulation and shows little evidence of leading to educational improvement. Rather than setting up incentives to divert instructional time to pointless test prep, he argues, we need to measure what matters and measure it in multiple ways, not just via standardized tests. Right now, we're lying to ourselves about whether our children are learning. And the longer we accept that lie, the more damage we do. It's time to end our blind reliance on high stakes tests. With *The Testing Charade*, Daniel Koretz insists that we face the facts and change course, and he gives us a blueprint for doing better. On the Same Track Carol Corbett

Burris, 2015-03-17 A public school principal's account of the courageous leaders who have dismantled the tracking systems in their schools in order to desegregate classrooms. What would happen if a school eliminated the tracks that rank students based on their perceived intellectual abilities? Would low-achieving students fall behind and become frustrated? Would their higher-achieving peers suffer from a watered-down curriculum? Or is tracking itself the problem? A growing body of research shows that tracking doesn't increase learning for the minority and low-income students who are overrepresented in low-track classrooms. This de facto segregation has led many civil rights advocates to argue that tracking is turning back the clock on equal education. As a principal at a New York high school, Carol Corbett Burris believed that the curriculum for the best students was the best curriculum for all. She helped lead a bold plan to eliminate tracking from her school, and the results couldn't have been further from the doom and gloom scenarios of tracking proponents. Instead, there was a dramatic improvement in the achievement of all students across racial and socioeconomic divisions and a near elimination of the achievement gap. Today, due to those efforts, International Baccalaureate English is the twelfth-grade curriculum for South Side students, and all students take the same challenging courses together to prepare them for college. In *On the Same Track*, Burris draws on her own experience, on the experiences of other schools, and on the latest research to make an impassioned case for detracking. Not only does the practice of tracking fail to benefit lower-tracked students, as Burris shows, but it also results in the resegregation of classrooms. Furthermore, she argues, many of today's popular reforms emanate from the same sort and select mentality that reinforces social stratification based on race and class. *On the Same Track* is a rousing
