himself generally rejected the cultivation of systems and techniques Shai Tubali argues that there are easily identifiable patterns through which Krishnamurti strove to realize his dialogical aims For this reason he refers to this method whose existence has evaded Krishnamurti's followers and scholars alike as the Krishnamurti dialogue He suggests that these discursive patterns serve to broaden our understanding of the possibilities of philosophical and religious dialogues and further illuminate established forms of dynamic discourse such as the Socratic method Inspired by Pierre Hadot's revolutionary reading of the classical Greco Roman texts the author centers his attention on Plato's Socratic dialogues and the guru-disciple conversations in the Hindu Upanishads which fall within the scope of what may be termed the transformative dialogue dialogues that have been written with the intention of bringing about a transformation in the mind of the interlocutor and reader and reorienting their way of life This text appeals to students as well as researchers and suggests that the Krishnamurti dialogue is not only a continuation and development of the transformative dialogue but that it also amalgamates ingredients of classical Western philosophy and South Asian mysticism Moreover this type of dialogue encourages readers to revisit the lost practice of transformative philosophy in that it reveals new pathways of philosophical and religious inquiry that bear thought provoking practical implications
