Committee,2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do *Sociology and Social Work Jo*

The Armed Forces Covenant in action? Great Britain: Parliament: House of Commons: Defence Committee,2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 3 5 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country

Mathematics in Early Years Education Ann Montague-Smith,Tony Cotton,Alice Hansen,Alison J. Price,2013-03-05 This third edition of the best selling *Mathematics in*

Nursery Education provides an accessible introduction to the teaching of mathematics in the early years. Covering all areas of mathematics learning: number and counting, calculation, pattern, shape, measures and data handling, it summarises the research findings and underlying key concepts and explains how adults can help children to learn through practical experiences, discussion and more direct intervention. This new edition has been fully updated to incorporate the latest research and thinking in this area and includes why mathematics is important as a way of making sense of the world, how attitudes to mathematics can influence teaching and learning, how children learn mathematics, new material on sorting, matching and handling data, ideas for observation and questioning to assess children's understanding, examples of planned activities, suggestions for language development, assessment criteria. This textbook is ideal for those training to be teachers through an undergraduate or PGCE route, those training for Early Years Professional Status and those studying early childhood on foundation or honours degrees as well as parents looking to explore how their young children learn mathematics. This will be an essential text for any Early Years practitioner looking to make mathematics interesting, exciting and engaging in their classroom.

Early Years Science Education Mike Watts, Alison Silby, 2020-04-28

The educational provision for early years is growing and changing across many parts of the world, not least in the UK. While this book leans heavily on the mounting literature on early child development in its broadest sense, physically, emotionally, linguistically, its central focus lies squarely on the growth of children's scientific thinking and activities. Written by educators, this book is based both on formal educational research and professional practice in action. The authors describe children's science concept development, their curiosity-driven exploration, emergent ecological literacy, their learning through science play, the assessment of early learning, the role of parents and practitioners within early education contexts, and some question the very basis of the science being taught. Illustrations and examples of practice are not confined to the UK, though the messages to be derived from each chapter have application way beyond the immediate context. This book was originally published as a special issue of *Early Child Development and Care*.
