explains why the climate change crisis is a symptom of a much larger underlying problem namely humankind s predilection with continuous GDP growth Given this starting point the world s high income nations must begin the transition to a qualitatively improving steady state economy and low income nations must follow suit at some stage over the next 20 40 years Unless they do a well designed emissions protocol will be as useless as the paper it is written on Adopting an ecological economic approach this book sets out why we must abandon the goal of continuous growth how we can do so in a way that improves human well being what constitutes a safe atmospheric concentration of greenhouse gases and what type of emissions protocol and emissions trading framework is likely to achieve a desirable climate change outcome Failure of the world s leaders to achieve these goals will not only put future human well being at risk it will threaten freedom in the liberal democratic tradition and international peace Yearbook of International Organizations 2005/2006 ,2005-06 For the Yearbook of International Organizations the most up to date and comprehensive reference to international organizations the UIA has selected the most important 31 086 organizations from its extensive database of current and previous organizations Yearbook provides profiles of 5 546 intergovernmental and 25 540 international non governmental organizations active in
