 advances the prototype theory of categorisation within a legal context The work adopts a multidisciplinary approach and
 draws on insights from cognitive psychology cognitive linguistics and analytic philosophy to discuss semantic problems
 present in law Designed as a bridge between cognitive linguistics and legal theory it argues that categorisation is a crucial
 cognitive operation for the application of law and that theories of categorisation are relevant to legal theory It makes the
 case that the prototype approach is better suited than more formal approaches usually utilised in jurisprudence to explaining
 many familiar linguistic problems found in law such as vagueness polysemy the flexibility of meaning the generality of
 language context dependence of meaning linguistic indeterminacy and so on The book focuses on problems of semantic
 analysis in law both in concrete cases that is particular cases before courts and at the theoretical level on methods of
