S. Private and Public Companies 2001** Thomson Gale,William J. Morin,2000 **Imaginarities of Modernity** John Rundell,2016-12-01 This book offers a new perspective on the issue of modernity through a series of interconnected essays Drawing centrally on the works of Castoriadis Luhmann Heller and Lefort and in critical discussion with Weber Durkheim Simmel Adorno Habermas and Taylor the author argues that modernity is not only a unique historical creation but also a multiple one With a focus on five broad themes the problem of understanding of modernity after the decline of grand narratives the complexity of the modern condition politics especially with reference to freedom and totalitarian regimes the variety and density of modern life and the centrality of a concept of culture to social and critical theory John Rundell advances the view that modernity is

not the outcome of an evolutionary process or historical development but is unique and indeterminate as are the constitutive dimensions that can be identified as modern. There are then different modernities. A rigorous engagement with a range of prominent and contemporary social theorists. Imaginaries of Modernity casts new light on the significance of understanding the multidimensional character of modernity and the plurality of its forms beyond the conventional paradigms associated with only the West. As such it will appeal to scholars of social theory, critical theory, sociology and philosophy concerned with questions of culture, politics and modernity.

Data governance in African health research: ELSI challenges and solutions
Donrich Thaladar, Simisola Oluwatoyin Akintola, Bonginkosi Shoji, 2025-04-02

Data protection legislation is increasingly being enacted in African countries. Additionally, the African Union recently adopted the AU Data Protection Framework. How are these legal and policy developments influencing established ethics notions about data governance in health research? For example, is broad or tiered consent to research participation sufficient, or does new legislation require specific consent? How do individual rights in data interact with communitarian values? Should health research receive special treatment from a data protection regulatory perspective? How should African countries approach AI in healthcare? This research topic aims to identify and analyse ELSI challenges in contemporary data governance in African health research and to develop possible solutions for such challenges. Articles in this research topic will aim to assist policy makers, health researchers and ELSI practitioners in Africa to better navigate and where relevant improve data governance in African health research. Perspective style articles as well as more in depth research articles are welcome. While articles can analyse fundamental theoretical issues, application oriented articles and articles that explore lessons learnt in practice are especially encouraged. Authors should address one or more of the following inter-related themes within the research topic of data governance in African health research:

1. Conflicts between new legal and policy developments and established ethics notions
2. Africanisation, decolonisation and intra-African rule harmonisation
3. The evolution of informed consent and the role of trust
4. The various legal, ethical and social dimensions or meanings of data and how these dimensions interact
5. Power and control. This includes individual, institutional, ethnic, community and national claims to data. It also includes existing and proposed structures of control of data such as data trusts and data transfer agreements (DTAs).
6. Engagement with data protection regulatory authorities
7. Artificial intelligence and Big Data.

Alien Zone Annette Kuhn, 1990. This is especially true of the science fiction film, a genre as old as cinema itself which has rarely received the serious attention devoted to such genres as the western, the film noir and recently under the aegis of feminist film theory the so-called woman's film. *Alien Zone* aims to bring science fiction cinema fully into the ambit of cultural theory in general and of film theory in particular. The essays in this book, some newly written, others gathered from scattered sources, look at the ways in which contemporary science fiction films draw on, rework and transform established themes and conventions of the genre: the mise en scene of future worlds, the myth of masculine mastery of nature, power and authority and their relation to technology. This material is ordered and

contextualized by the editor with a view to exploring how science fiction cinema has been approached critically and theoretically by commentators on the genre as a mirror of society as bearing or producing ideology as caught up in an intertext of media productions or as expressing unconscious desires Contributors include Giuliana Bruno Scott Bukatman Thomas B Byers Barbara Creed Anne Cranny Francis Daniel Dervin H Bruce Franklin James H Kavanagh Douglas Kelner Steve Neale Judith Newton Constance Penley Hugh Ruppersberg Michael Ryan Vivian Sobchack Michael Stern J P Telotte and Paul Virilio Catalog of Copyright Entries.
