Yang,2005-08-31 The essays presented here reflect recent widespread interest in reconsidering the political geographical and cultural boundaries conventionally observed by area specialists and others They intentionally range widely through time and space dealing with diverse issues and contexts but each highlights the very general theme of cross cultural interaction Although they draw heavily on area studies the contributors seek to put previously separate bodies of scholarship in dialogue

with one another by exploring those interactions that have historically linked world regions Four general themes are especially prominent in this volume and the essays develop sophisticated positions on each On the issue of agency and structure they offer useful guidance toward recognizing the importance of both human agency and historical structures in historical processes On the theme of states and their roles in cross cultural interactions they acknowledge that states do not entirely control their own destinies but nevertheless deeply influence the development of these exchanges sometimes decisively so Regarding the theme of the global and the local they emphasize the reciprocal influence of global dynamics and local circumstances and agree that analyses must take both into account to be successful Finally all of the essays allow that the theme of cross cultural interaction is crucial to understanding the world and its development through time Contributors C A Bayly Sven Beckert Jerry H Bentley Renate Bridenthal Charles Bright Michael Geyer Alan L Karras Adam McKeown Colin Palmer Stephen H Rapp Jr Caroline Reeves John O Voll K ren Wigen Anand A Yang
