Thermo-Hydro-Mechanical-Chemical Processes in Fractured Porous Media: Modelling and Benchmarking Olaf Kolditz, Hua Shao, Wenqing Wang, Sebastian Bauer, 2014-11-26 The present book provides guidance to understanding complicated coupled processes based on the experimental data available and implementation of developed algorithms in numerical codes Results of selected test cases in the fields of closed form solutions e g deformation processes single processes such as groundwater flow as well as coupled processes are presented It is part of the OpenGeoSys initiative an open source project to share knowledge and experience in environmental analysis and scientific computation with the community

Forensic Science Laboratory Benchmarking Max M. Houck, Paul J. Speaker, 2024-03-26 Forensic Science Laboratory Benchmarking The FORESIGHT Manual takes a step by step instructional approach to utilizing FORESIGHT data detailing how labs can participate in the process to improve efficiencies The FORESIGHT Project a business benchmarking process for forensic service providers was created in 2008 to collect and report data while offering improvement to processes through analysis comparisons and best practice evaluations The program has grown to include more than 200 participating forensic laboratories worldwide FORESIGHT offers the capability for labs to improve core functions provide and benefit from metrics and thus improve the labs capabilities and

functioning for the public good while maintaining their often limited fixed budgets Due to ever increasing caseloads forensic laboratories are constantly plagued by backlogged casework cases submitted to the laboratory but not yet worked This leads to inefficiencies delays and unhappy agencies expecting timely results Unfortunately even if a lab's slates were wiped clean and the backlog were erased many of the inefficient processes that created the backlog would still be in place Eventually and inevitably the lab would develop a new backlog Unique coverage and features Presents critical and proven cutting edge measures to utilize FORESIGHT data improve laboratory testing operational efficiency and policies without added additional costs Synthesizes the data input from more than 200 labs and a decade's worth of analytics to illustrate process improvements and the advantages of participating Outlines how to develop data driven responses to solve current and future problems Forensic Science Laboratory Benchmarking will be of interest to quality assurance specialists economists supervisors in the parent agencies of the labs managers at all levels of any of the hundreds of public laboratories around the world and anyone concerned about the effectiveness and efficiency of laboratory testing As an operational guide the book provides a helpful roadmap to help public science agencies and forensic labs analyze how they operate improve on what works and change what doesn't to better meet their mission and serve their community's goals *Benchmarks for Science Literacy* American Association for the Advancement of Science, 1994-01-06 Published to glowing praise in 1990 Science for All Americans defined the science literate American describing the knowledge skills and attitudes all students should retain from their learning experience and offered a series of recommendations for reforming our system of education in science mathematics and technology Benchmarks for Science Literacy takes this one step further Created in close consultation with a cross section of American teachers administrators and scientists Benchmarks elaborates on the recommendations to provide guidelines for what all students should know and be able to do in science mathematics and technology by the end of grades 2 5 8 and 12 These grade levels offer reasonable checkpoints for student progress toward science literacy but do not suggest a rigid formula for teaching Benchmarks is not a proposed curriculum nor is it a plan for one it is a tool educators can use as they design curricula that fit their student's needs and meet the goals first outlined in Science for All Americans Far from pressing for a single educational program Project 2061 advocates a reform strategy that will lead to more curriculum diversity than is common today IBenchmarks emerged from the work of six diverse school district teams who were asked to rethink the K 12 curriculum and outline alternative ways of achieving science literacy for all students These teams based their work on published research and the continuing advice of prominent educators as well as their own teaching experience Focusing on the understanding and interconnection of key concepts rather than rote memorization of terms and isolated facts Benchmarks advocates building a lasting understanding of science and related fields In a culture increasingly pervaded by science mathematics and technology science literacy require habits of mind that will enable citizens to understand the world around them make some sense of new technologies as they emerge and grow and deal sensibly with problems that

involve evidence numbers patterns logical arguments and technology as well as the relationship of these disciplines to the arts humanities and vocational sciences making science literacy relevant to all students regardless of their career paths If Americans are to participate in a world shaped by modern science and mathematics a world where technological know how will offer the keys to economic and political stability in the twenty first century education in these areas must become one of the nation s highest priorities Together with Science for All Americans Benchmarks for Science Literacy offers a bold new agenda for the future of science education in this country one that is certain to prepare our children for life in the twenty first century

Innovative Methods of Teaching and Learning Chemistry in Higher Education Ingo Eilks,Bill Byers,2015-11-06 Two recent initiatives from the EU namely the Bologna Process and the Lisbon Agenda are likely to have a major influence on European Higher Education It seems unlikely that traditional teaching approaches which supported the elitist system of the past will promote the mobility widened participation and culture of life long learning that will provide the foundations for a future knowledge based economy There is therefore a clear need to seek new approaches to support the changes which will inevitably occur The European Chemistry Thematic Network ECTN is a network of some 160 university chemistry departments from throughout the EU as well as a number of National Chemical Societies including the RSC which provides a discussion forum for all aspects of higher education in chemistry This handbook is a result of one of their working groups who identified and collated good practice with respect to innovative methods in Higher Level Chemistry Education It provides a comprehensive overview of innovations in university chemistry teaching from a broad European perspective The generation of this book through a European Network with major national chemical societies and a large number of chemistry departments as members make the book unique The wide variety of scholars who have contributed to the book make it interesting and invaluable reading for both new and experienced chemistry lecturers throughout the EU and beyond The book is aimed at chemistry education at universities and other higher level institutions and at all academic staff and anyone interested in the teaching of chemistry at the tertiary level Although newly appointed teaching staff are a clear target for the book the innovative aspects of the topics covered are likely to prove interesting to all committed chemistry lecturers

Chemical Linkers in Antibody-Drug Conjugates (ADCs) Floris van Delft, John M. Lambert, 2021-12-22 The covalent conjugation of potent cytotoxic agents to monoclonal antibodies known as antibody drug conjugates ADCs is a powerful approach in the field of targeted cancer treatment Clearly both monoclonal antibody and cytotoxic payload are crucial elements in determining the clinical value of an ADC and have received ample attention However the structural element connecting the two the chemical linker also plays an essential role in mode of action efficacy pharmacokinetics and safety profile of an ADC but is often underappreciated in considerations of ADC design Chemical Linkers in Antibody Drug Conjugates ADCs aims to shine a detailed light on the various key attributes of chemical linkers in ADCs for drug to antibody ratio for stability for release mechanism of payload for pharmacokinetics for stability determination and for efficacy and safety Ideal for postgraduate students and active researchers in drug discovery and

development this book provides a comprehensive description of linkers used in ADCs clinical and late preclinical insight into key quality attributes of linkers for ADCs and aids the reader in understanding the role of linker chemistry and designing new ADCs The Future of U.S. Chemistry Research National Research Council, Division on Earth and Life Studies, Board on
