and human rationality and other related things It s a meta study that personally fascinates this author Why are humans rational beings Why is there logic and other kinds of order Why is there intelligibility The self evident existence of reason logic and intelligibility are strong evidence for God Reason is an undeniable human faculty that defines humanness and points to a rational universe This in turn points to the principle of reason or the logos developed by Heraclitus and other Greek philosophers and later by the Apostle John Reason and its corollaries emerge like aspects of language and complement each other like speaking and listening Indeed mutual communication works because of reciprocity which is a root form of intelligibility This seems to be the structure or order which is best explained by a rational divine Mind that exists eternally in reciprocal complementarity This then is an exploration of the role of the Logos principle in the human experience and

condition we often refer to as Reality It is an attempt to answer these four questions and others related to it Why do reason and logic work Why do we believe and trust in them Why do we expect things to make sense Why does anything make sense at all
