Recent Development in Energy Conversion Systems Sunday Olayinka Oyedepo, Fidelis Ibiang Abam, Olusegun David Samuel, Oluseyi Olanrewaju Ajayi, Abimbola Patricia Popoola, Diana-Andra Borca-Tasciuc, 2024-03-15 In this industrial and technological age, energy plays a principal role in sustainable development. This is connected to issues regarding availability, production processes, utilization and environmental impact. Due to the increased rate of population growth, the energy demand in the entire world is getting to the level that it may not be sustained in the nearest future if drastic action is not taken to address the situation, especially from research and development perspectives. None of the millennium development goals (MDGs) can be completed without considerable improvements in the quality and quantity of energy services in developing countries according to the United Nations Development Programme (UNDP). Based on this fact, UNDP is making efforts, especially in developing countries, to ensure that people have access to sustainable sources of clean, reliable and affordable energy, since every aspect of human development is highly impacted by this vital resource.
