Success of the **BUILD INTEC 2016**

Building construction, which started as a purely functional need for roof above the head has, over time, evolved as a highly complex and refined form. It is today a significant part of industrial and social culture. The new trends and technologies can produce a widely varied built environment to serve the diverse needs of society. Consequently, the construction industry is the second largest industry of the country after agriculture. It makes a significant contribution to the national economy and provides employment to large number of people.

BUILD INTEC 2016, the 8th edition in the series of COORDBA's premier Building and Construction Expo was an endeavour to bring under one roof, the innovation, experimentation and mastery, trends and technologies of the art of building construction, for the benefit of the producers as well as the end users. The highlight of this edition was the display of technology on home automation, and smart planning & so on.

Fashions of building facades, interiors and interaction meetings between the producers and visitors had added value to the fair and visitors got an exposure to the latest in Construction and Building Technology.
