

STUDYING PEDIGREES ACTIVITY

Introduction: A **pedigree** is a visual chart that depicts a family history or the transmission of a specific trait. They can be interesting to view and can be important tools in determining patterns of inheritance of specific traits. Pedigrees are used primarily by genetic counselors when helping couples decide to have children when there is evidence of a genetically inherited disorder in one or both families. They are also used when trying to determine the predisposition of someone to carry a hereditary disease for example, familial breast cancer.

The Components of a Pedigree:

Squares are used to indicate males in a family.

Circles are used to indicate females.

If the individual is "affected" by the trait (dominant or recessive) we darken the shape.

A line between a male and a female indicates a marriage or union.

A line drawn down from the marriage line indicates offspring.

Sometimes, you will see some shapes filled in only half way - this notation indicates a *hybrid* (heterozygous) or *carrier* of the trait. Not all pedigrees use this symbol, however.
