A Comparative Analysis of Taxes and CO2 Emissions from Passenger Cars in the Nordic Countries Henrik Duer, Camilla Rosenhagen, Nordic Council of Ministers, 2011. The report discusses how economic instruments can be used to reduce CO2 emissions from passenger cars in the Nordic countries. The analysis indicates that the registration tax and the annual circulation tax can contribute to a reduction in the average CO2 emission from new cars. Company car schemes in the Nordic countries provide incentives for larger cars and increased driving because of subsidies and this has long term effect as a large share of new cars are registered as company cars but are used as private cars most of their lives. CO2 differentiated taxes can provide incentives to consumers to purchase CO2 efficient cars targeted broader packages which besides providing tax incentives also offer advantages to more environmentally friendly cars can be more effective than general tax increases. Transparency of targets and instruments is crucial for a large diffusion of CO2 efficient cars.

Shared Meanings in the Film Music of Philip Glass Tristian Evans, 2016-03-03. The study of music within multimedia contexts has become an increasingly active area of scholarly research. However the application of such studies to musical genres outside the classical film canon or in television and other media remains largely unexplored in any detail. Tristian Evans demonstrates how postminimal music interacts with other media forms focusing on the film music by Philip Glass but also taking into account works by other composers such as Steve Reich, Terry Riley, John Adams and others inspired by minimalist and postminimal practices. Additionally Evans develops innovative ways of analysing this music based on an interdisciplinary approach and draws on research from areas that include philosophy, linguistics and film theory. The book offers one of the first in depth studies of Philip Glass's music for film considering *The Hours* and *Dracula*. Nagoyqatsi, Notes on a Scandal and Watchmen while examining re applications of the music in new cinematic and televisual contexts. The book will appeal to musicologists but also to those working in the fields of film music, cultural studies, media studies and multimedia.
