Metaphysical Questions (Book -2) Mustafa Karnas, 2021-02-13 PRESENTATION This book consists of questions asked by Mustafa KARNAS under the name of AKILTA I SORULARI and answered by him The content of the questions is completely a product of CONSCIOUSNESS and it is an occasion for the reader to think to contemplate to open new windows in that person's mind to form a new thinking system and to meet the person's METAPHYSICAL systematic and knowledge The questions and their answers are about esoteric spirituality reason intelligence knowledge science and areas that need to be questioned in life MUSTAFA KARNAS QUESTION What could be the first thing the creator created Why and how he had to create himself ANSWER Himself of course this is a speculative answer my truth subjective as some things cannot be tested God and creation are both concepts the creativity of a structure in the position of infinity is that it imprisons itself in a concept greater than god force it is he who creates the god By conceptualizing himself as a god limiting himself as a system to being creator infinity is limited by making himself god creator in order to manifest his time his time to form the movement Since everything that has been created is not in the position to create something it is marked by finitude the infinity god will end creation that is at that moment when the energy field ceases to be god the whole universe will already begin at a point the neutrino flow called the soul in everything stop the electron motion stops and everything collapses into it nothing remains because but White movement creates understanding and reality in its own way QUESTION A person who identifies something with his own archetype the archetype of the thing itself what state does it make ANSWER Makes it a belief QUESTION What is the value that equates the inequality state When you observe an uneven distribution in a field you make a judgment that the distribution is uneven the question is why did you observe this area ANSWER Trust Since nobody observes inequality in a trustful environment inequality disappears if there is no observation there is no event Those who do not trust always observe and always see inequality and the state of inequality persists and a person who trusts justice has confidence in sharing does not control sharing and the perception of inequality disappears **US Solutions Manual to Accompany**

**Spectroscopy, Atomic Structure and Chemical Bonding** Terry L. Meek, 1998 An Introduction to Spectroscopy presents the most fundamental concepts of inorganic chemistry at a level appropriate for first year students and in a manner comprehensible to them This is true even of difficult topics such as the wave mechanical atom symmetry elements and symmetry operations and the ligand group orbital approach to bonding The book contains many useful diagrams illustrating among other things the angular dependence of atomic wave functions the derivation of energy level diagrams for polyatomic

molecules close packed lattices and ionic crystal structures The diagrams of the periodic variation of atomic and molecular properties showing trends across periods and down groups simultaneously are especially instructive Spectroscopy is presented mainly as a tool for the elucidation of atomic and molecular structures Each chapter begins with a clear and concise statement of What Every First year Student Should Know About outlining the background knowledge that the student is assumed to have from previous courses and thus pointing out what topics might need to be reviewed There are also detailed statements of the objectives of each chapter a number of worked examples interspersed in the text and a comprehensive set of problems and exercises to test the student s understanding Tables of data throughout the text and appendices at the end provide much valuable information
