Flain,2011-12-08 Boxers do what the vast majority of us will never do they stand toe to toe and try to inflict as much punishment upon each other as possible In Chasing Rocky J P Flain a suburban father of two and cohost of The Sports Junkies on 106 7 The Fan in Washington DC became a part of that small percentage of people drawn to become a boxer What started as a crazy idea from the arena seats of a professional boxing match transforms into a personal challenge that the deejay cannot ignore This memoir follows the journey of this average Joe who chases his dream and discovers theres more to boxing than what can be seen inside the ropes Chasing Rocky narrates Flains foray into the boxing world where he encounters a dubious boxing promoter who sees only dollar signs a no nonsense trainer who tests his resolve an aspiring pro who longs for a title shot and an icon who has inspired millions Chasing Rocky presents an inside look at the brutal training boxers endure From facing fears to dealing with the pain of getting punched Flain tackles the

But someone close to her is determined to keep the truth of what happened all those years ago hidden.

Electric Mountains Shaun A. Golding, 2021-07-16 Climate change has shifted from future menace to current event. As eco conscious electricity consumers we want to do our part in weening from fossil fuels but what are we actually a part of? Committed environmentalists in one of North America's most progressive regions desperately wanted energy policies that address the climate crisis. For many of them wind turbines on Northern New England's iconic ridgelines symbolize the energy transition that they have long hoped to see. For others however ridgeline wind takes on a very different meaning. When weighing its costs and benefits locally and globally some wind opponents now see the graceful structures as symbols of corrupted energy politics. This book derives from several years of research to make sense of how wind turbines have so starkly split a community of environmentalists as well as several communities. In doing so it casts a critical light on the roadmap for energy transition that Northern New England's ridgeline wind projects demarcate. It outlines how ridgeline wind conforms to antiquated social structures propping up corporate energy interests to the detriment of the swift de carbonizing and equitable transformation that climate predictions warrant. It suggests therefore that the energy transition of which most of us are a part is probably not the transition we would have designed ourselves if we had been asked. **Death by Demo**
