Heart of the Jaguar James Campbell, 2025-11-04 A fascinating story of the movement to protect the jaguar and the man who devoted his life to saving the species Once indigenous to North America the jaguar is one of the wildest creatures left on the planet a resilient and efficient predator with a natural habitat that extends throughout Mexico and Central and South America But today one million years after it appeared in the New World the jaguar is struggling to survive It has disappeared entirely from Uruguay and El Salvador and is critically endangered across much of its range Heart of the Jaguar tells the story of the extraordinary undertaking to save the jaguar as well as the impassioned conservationist who dedicated his life to the species James Campbell tracks the legacy of Alan Rabinowitz a complex personality and a formidable scientist whom Time magazine called the Indiana Jones of wildlife protection Rabinowitz first studied jaguars in the jungles of Belize and the Brazilian Pantanal in the 1980s and later led the charge for the Jaguar Corridor Initiative making it his dying mission to protect the big cat s historic habitat Campbell journeys across two continents in search of the species past present and future taking readers from the Bering Land Bridge to pre Columbian jungle temples and modern day jaguar preserves Despite the thriving trade in jaguar parts and the ravages of industrial agriculture and climate change Campbell finds sources of hope wildlife biologists Indigenous organizers ranchers and park administrators who carry on Rabinowitz s legacy Compelling and clear eyed Heart of the Jaguar celebrates these protectors who continue to make enormous personal sacrifices to ensure that jaguars the most charismatic of all the big cats always have a home on this planet **Plunkett's**

Mahler,2009-09-01 When the nature writer Richard Mahler discovers that wild jaguars are prowling a remote corner of his home state of New Mexico he embarks on a determined quest to see in the flesh a big beautiful cat that is the stuff of legend yet verifiably real Mahler s passion sets in motion a years long adventure through trackless deserts steamy jungles and malarial swamps as well as a confounding immersion in centuries old debates over how we should properly regard these powerful predators as varmints or as icons trophies or gods He is drawn from border badlands south to Panama s rain forest along a route where the fate of nearly all wildlife now rests in human hands Mahler s odyssey introduces him to unrepentant poachers pragmatic ranchers midnight drug runners ardent conservationists trance induced shamans hopeful biologists stodgy bureaucrats academic philosophers macho hunters and gentle Maya Indians Along the way he is forced to reconsider the true meaning of his search and the enduring symbolism of the jaguar

Nobel Universal Graphical Language Milan Randic,2010-05-24 Nobel is a pictographic language based on some 120 basic signs and many arrows of different shape that are mutually combined It is named after Alfred Nobel 18331896 Swedish chemist and industrialist inventor of dynamite who left most of his fortune to a foundation that annually gives awards to individuals whose work is characterized as greatest benefit to mankind known as Nobel Prizes Besides the awards for sciences and literature significantly Alfred Nobel included among others a prize for peace that besides individuals also organizations may obtain Although it would be utopian to believe that human conflicts could be avoided if communication tools would improve the emergence of universal languages certainly cannot make the situation worse Universal languages are a communication tool which makes it possible for people of no common language to communicate They are graphic but they should be distinguished from picture writings which only passively offer information on some event or give messages Universal languages have more similarity with the sign languages that are used for people

who lost hearing or the sign language of American Plains Indians who spoke different languages and could communicate by sign language that they developed However written language has some advantages over hand sign languages in that one can communicate at a great distance particularly today in the age of fax and computer communications and that one can leave messages for posterity This is not the place to argue for or against the promise of written sign languages Graphic written sign languages exist today and the best known are Chinese characters used in China and Japan The problem with Chinese characters is that there are too many characters and it is difficult to learn so many It takes years for children in China and Japan to learn so many different characters and the task would be even harder for grown people to learn if they have not done this when young Nobel is designed to remove this difficulty and is based on the following requirements 1 SMALL NUMBER OF BASIC SIGNS 2 SIGNS SHOULD BE EASY TO RECOGNIZE 3 SIGNS SHOULD BE EASY TO REPRODUCE 4 COMBINATIONS LIMITED TO THREE SIGNS 5 COMPLEMENTARY We have already mentioned that Nobel uses about 120 basic signs which can be viewed as a small number particularly in view of over 100 signs of Nobel that are so obvious that they can be easily absorbed The other requirements are also very important There are many signs that can be easily recognized but in order to be acceptable for Nobel they also need to be easily reproduced because that will facilitate communication Also when making combinations of signs one has to make some restriction in order to maintain clarity so we decided to have no more than three signs combined into single word Finally the last requirement that of complementarities needs some explanation Besides having signs that one can easily recognize and easily draw one needs some structure to be embedded into composition of signs that facilitates one to remember and learn signs easily We refer to this structure as complementary or broadly speaking associational and what it implies is that words and objects that are related should have related signs Thus for example pairs of words like man woman cat dog coffee tea good bad love hate etc should have signs that are in some opposition while words like smoke flame fire tree wood forest water sea ocean good better best should have signs that are in competition With this in mind when one sees and learns the basic signs the meaning of many combinations of signs can be in advance anticipated This helps one to learn Nobel rather fast not months not weeks perhaps not even days but a couple of hours may suffice that one may learn hundreds and hundreds of words In this respect Nobel may be unique among languages written spoken of
