14 Mathematics Papermemo December:

The Crusade for Equality in the Workplace Robert Belton, 2014-04-14 On March 8 1971 the Supreme Court of the United States decided a case *Griggs v Duke Power Co* brought by thirteen African American employees who worked as common laborers and janitors at one of Duke Power's facilities The decision in plaintiffs favor marked a profound and enduring challenge to the dominance of white males in the workplace In this book Robert Belton who represented the plaintiffs for the NAACP Legal Defense Fund and argued the case in the lower courts gives a firsthand account of legal history in the making and a behind the scenes look at the highly complex process of putting civil rights law to work Title VII of the Civil Rights Act of 1964 eliminated much blatant discrimination but after its enactment and before *Griggs* businesses held the view that a commitment to equality required only eliminating policies and practices that were intentionally discriminatory the disparate treatment test In *Griggs v Duke Power Co* the Supreme Court ruled that a disparate impact test could also apply that the 1964 Civil Rights Act extended to practices with a discriminatory effect In tracing the impact of the *Griggs* ruling on employment practices this book documents the birth maturation death and rebirth of the disparate impact theory including its erosion by later Supreme Court decisions and its restoration by congressional action in the Civil Rights Act of 1991 Belton conducts us through this historic case from the original lawsuit to the Supreme Court decision in *Griggs* and beyond as he traces the post *Griggs* developments in the lower courts the Supreme Court and Congress he provides informed insights into both litigators and judges perspectives and decision making His work situates the case in its legal social and historical contexts and explores the relationship between public and private enforcement of the law with a focus on the Legal Defense Fund's litigation campaign against employment discrimination A detailed examination of the development of legal principles under Title VII this book tells the story of this seminal decision on equal employment law and offers an unprecedented close up view of personal conviction legal strategy and historical forces combining to effect dramatic social change *Catalogue, Books and Journals in Advanced Mathematics* American Mathematical Society, 1985 **Technical Report - Jet Propulsion Laboratory, California Institute of Technology** Jet Propulsion Laboratory (U.S.), 1970 **Guide to Annual Subject Index for Technical Publications Announcements, Apr.-Dec. 1962** United States. and parsimonious legislatures In recent years the presidents have been challenged by students and faculty who have demanded more active roles in university governance and by a Board of Regents and the Council on Higher Education which have raised challenging new issues Harrison's account of the institution's development is laced with anecdotes and vignettes of some of the school's interesting personalities President Henry Hardin Cherry whose chapel talks convinced countless students that the Spirit Makes the Master Uncle Ed Diddle whose flying towel and winning teams earned national basketball fame Daddy Burton who could catch flies while lecturing Miss Gabie Robertson who held students into the next class period the lone Japanese student who was on campus during World War II Harrison also recalls steamboat excursions the Great Depression and the Second World War the astounding boom in enrollment and buildings in the 1960s the period of student unrest and the numerous fiscal crises that have beset the school This is the story of an institution proud of its past and seeking to chart its course into the twenty first century

The New Era in American Mathematics, 1920-1950 Karen Hunger Parshall, 2022-02-22 The 1920s witnessed the birth of a serious mathematical research community in America Prior to this mathematical research was dominated by scholars based in Europe but World War I had made the importance of scientific and technological development clear to the American research community resulting in the establishment of new scientific initiatives and infrastructure Physics and chemistry were the beneficiaries of this renewed scientific focus but the mathematical community also benefitted and over time began to flourish Over the course of the next two decades despite significant obstacles this constellation of mathematical researchers programs and government infrastructure would become one of the strongest in the world In this meticulously researched book Karen Parshall documents the uncertain but ultimately successful rise of American mathematics during this time Drawing on research carried out in archives around the country and around the world as well as on the secondary literature she reveals how geopolitical circumstances shifted the course of international mathematics She provides surveys of the mathematical research landscape in the 1920s 30s and 40s introduces the key players and institutions in mathematics at that time and documents the effect of the Great Depression and the second world war on the international mathematical community The result is a comprehensive account of the shift of mathematics center of gravity to the American stage

Susquehanna University, 1858-2000 Donald D. Housley, 2007-03 Susquehanna University's history from 1858 to 2000 has occurred in three stages each expressing a different mission. The school was founded in 1858 as the Missionary Institute of the Evangelical Lutheran Church to fulfill the vision of the Rev Benjamin Kurtz, a Lutheran cleric and editor of the Lutheran Observer. He was a partisan of the American Lutheran viewpoint caught up in a fratricidal battle with Lutheran orthodoxy. The Missionary Institute sustained his viewpoint in the preparation of men called to preach the gospel in foreign and home missions. A complementary purpose was to educate young people in Selinsgrove, Pennsylvania, at both the Institute and its sister school, the Susquehanna Female College. When the Female College folded in 1873, the Institute became coeducational.
