Innovation + Equality Joshua Gans, Andrew Leigh, 2019-10-29 How to get more innovation and more equality Is economic inequality the price we pay for innovation The amazing technological advances of the last two decades in such areas as artificial intelligence genetics and materials have benefited society collectively and rewarded innovators handsomely we get cool smartphones and technology moguls become billionaires This contributes to a growing wealth gap in the United States the wealth controlled by the top 0.1 percent of households equals that of the bottom ninety percent Is this the inevitable cost of an innovation driven economy Economist Joshua Gans and policy maker Andrew Leigh make the case that pursuing innovation does not mean giving up on equality precisely the opposite In this book they outline ways that society can become both more entrepreneurial and more egalitarian All innovation entails uncertainty there is no way to predict which new technologies will catch on Therefore Gans and Leigh argue rather than betting on the future of particular professions we should consider policies that embrace uncertainty and protect people from unfavorable outcomes To this end they suggest policies that promote both innovation and equality If we encourage innovation in the right way our future can look more like the cheerful techno utopia of Star Trek than the dark techno dystopia of The Terminator
