Who Cares about Maths anyway? Dr Majeda Awawdeh, 2019-06-02 In *Who Cares about Maths Anyway* Majeda Awawdeh PhD addresses the top issues with Australia's current education system in her honest analytical overview. Over the course of the book teachers, students and parents are given the opportunity to explore the deep seated problems of their current school system including a lack of teacher training and development, one size fits all curricula and unfocused government funding. Along with this insightful analysis Dr Awawdeh introduces a long term vision that can improve the system for all involved resulting in the progression of student success and higher ranking worldwide. Individuals looking for in depth research in the area of the Australian education system will find her book a valuable resource in their quest to solve the problems today's students face

Stability and Control Processes Nikolay Smirnov, Anna Golovkina, 2022-03-15 The proceedings of the 4th Stability and Control Processes Conference are focused on modern applied mathematics, stability theory and control processes. The conference was held in recognition of the 90th birthday of Professor Vladimir Ivanovich Zubov 1930-2000. This selection of papers reflects the wide ranging nature of V I Zubov's work which included contributions to the development of the qualitative theory of differential equations, the theory of rigid body motion, optimal control theory and the theory of electromagnetic fields. It helps to advance many aspects of the theory of control systems including questions of motion stability, nonlinear oscillations in control systems, navigation and reliability of control devices, vibration theory and quantization of orbits. The disparate applications covered by the book in mechanical systems, game theory, solid state physics, socio-economic systems and medical and biological systems, control automata and navigation are developments from Professor Zubov's in depth studies on the theory of stability of motion, the theory of automatic control and the theory of the motions of optimal processes. *Stability and Control Processes* presents research continuing the legacy of V I Zubov and updates it with sections focused on intelligence based control. These proceedings will be of interest to academics, professionals working in industry and researchers alike

Analytical Methods in Nonlinear Oscillations Ebrahim Esmailzadeh, Davood Younesian, Hassan Askari, 2018-06-29 This book covers both classical and modern analytical methods in nonlinear systems. A wide range of applications from fundamental research to engineering problems are addressed. The book contains seven chapters each with miscellaneous problems and their detailed solutions. More than 100 practice problems are illustrated which might be useful for students and researchers in the areas of nonlinear oscillations and applied mathematics. With providing real world examples this book shows the multidisciplinary emergence of nonlinear dynamical systems in a wide range of applications including mechanical and electrical oscillators, micro nano resonators and sensors and also modelling of global warming, epidemic diseases, sociology, chemical reactions, biology and ecology.
