2014 Life Science Grade11 November Memo

Sabine Zange

2014 Life Science Grade11 November Memo:

All We Want Michael Harris, 2025-04-01 Our lives are defined by a story of endless growth and consumption Now a climate crisis demands that we change Can we write new stories In All We Want award winning author Michael Harris dismantles our untenable consumer culture and delivers surprising heartwarming alternatives Drawing on the wisdom of philosophers scientists and artists Harris uncovers three realms where humans have always found deeper meaning the worlds of Craft the Sublime and Care Past attempts to blunt our impact on the environment have simply redirected our consumption we bought fuel efficient cars and canvas tote bags We cannot however buy our way out of this crisis We need instead compelling new stories about life s purpose Part meditation and part manifesto All We Want is a blazing inquest into the destructive and unfulfilling promise of our consumer society and a roadmap toward a more humane future

Diversity and Education Michael Vavrus, 2015-04-28 In his new book Michael Vavrus helps readers better understand why issues of diversity and difference are so highly contested in the United States and across the globe Vavrus incorporates specific education examples throughout the text to examine six contested areas race and ethnicity socioeconomic class and culture multicultural and ethnic studies language religion and sexuality and gender In each of these areas the author explores how contrasting worldviews found in social conservatism liberal multiculturalism and critical multiculturalism influence our understandings about difference and diversity and the education policies we develop as a result Diversity and Education is designed to help educators move beyond the how can they believe that knee jerk reaction toward a more informed strategic understanding of belief systems and political affiliations Book Features Brings a contemporary 21st century perspective to differing political orientations toward diversity and education Examines outcomes of diversity debates on children of color the poor immigrants women and sexual and religious minorities Uses critical pedagogy with a historical and political economy lens to explain current diversity issues in education Critiques the diversity stance of new national teacher education standards from the Council for Accreditation of Educator Preparation Diversity and Education can not only help us have conversations about racism institutionalized oppression and cultural fear it can also offer an intervention that can move readers towards a deeper critical consciousness about diversity and multicultural education in their own lives From the Foreword by Wayne Au associate professor at the University of Washington Bothell and an editor for Rethinking Schools Few education scholars have offered as potent and cogent a political and economic analysis of multicultural education and diversity as Professor Michael Vavrus has in his new book His critique of neoliberalism via critical pedagogy and his advocacy of social justice education are timely and praiseworthy Ramin Farahmandpur professor Graduate School of Education Portland State University Diversity and Education is a must read for anyone concerned about why so many policies claiming to help diverse students fail and what alternatives exist Vavrus clearly believes in the power of teachers who are well educated critical thinkers In this lucid and compelling text he skillfully applies a highly useful framework to unpack

historical and contemporary debates about core concepts underlying multiple struggles for education and rights Christine Sleeter professor emerita California State University Monterey Bay The Schenley Experiment Jake Oresick, 2017-04-14

The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America's oldest public schools *Smoke on the Water* Dario Fazzi, 2023-10-31

The U S government military and industry once saw ocean incineration as the safest and most efficient way to dispose of hazardous chemical waste Beginning in the late 1960s toxic chemicals such as PCBs and other harmful industrial byproducts were taken out to sea to be destroyed in specially designed ships equipped with high temperature combustion chambers and smokestacks But public outcry arose after the environmental and health risks of ocean incineration were exposed and the practice was banned in the early 1990s *Smoke on the Water* traces the rise and fall of ocean incineration showing how a transnational environmental movement tested the limits of U S political and economic power Dario Fazzi examines the anti ocean incineration movement that emerged on both sides of the Atlantic arguing that it succeeded by merging local advocacy with international mobilization He emphasizes the role played at the grassroots level by women migrant workers and other underrepresented groups who were at greatest risk Environmental groups for their part gathered and shared evidence about the harms of at sea incineration building scientific consensus and influencing international debates *Smoke on the Water* tells the compelling story of a campaign against environmental degradation in which people from marginalized communities took on the might of the U S military industrial complex It offers new insights into the transnational dimensions of environmental regulation the significance of nonstate actors in international history and the making of environmental justice movements

Global Social Policy Kepa Artaraz, Liz Cunningham, Michael Hill, 2016-06-29

Social policy is a subject that helps develop our understanding of the meaning of human wellbeing and of the systems by which wellbeing must be promoted. As a discipline, social policy has traditionally been blunted by a focus on the nation state; however, in this age of globalisation, the most pressing challenges such as climate change, ageing populations and flagging economies serve as proof that even at national level, social policy is now more heavily influenced by global factors than ever before. In this important and authoritative text, Kepa Artaraz and Michael Hill provide a richly detailed contribution to our understanding of the global forces shaping social problems today. Part One discusses the different approaches to social policy and explores the process of globalisation, looking particularly at its winners and losers and the implications it has for human wellbeing. Part Two examines more closely the key actors in global social policy, such as the market, the state and international organisations, and Part Three provides an opportunity to explore some specific key issues of global importance, such as employment and migration, demographic change and global poverty. Adding considerable momentum to the movement away from a reductionist, nationally focused study of the discipline, *Global Social Policy* opens up new and stimulating discussions and provides a fresh framework for the study of human wellbeing. Using policy examples from areas around the world to provide a truly international scope, it is an essential read for students studying at all levels. **Довго і**

щасливо Пол Долян, 2020-04-24 Net Privacy Sacha Molitorisz, 2020-05-21 In our digital world, we are confused by privacy: what is public, what is private? We are also challenged by the conditions of privacy, so uncertain we become unsure about our rights to it. We may choose to share personal information, but often do so on the assumption that it won't be re-shared, sold or passed on to other parties without our knowing. In the eighteenth century, philosopher Jeremy Bentham wrote about a new model for a prison called a Panopticon, where inmates surrounded the jailers, always under watch. Have we built ourselves a digital Panopticon? Are we the guards or the prisoners, captive or free? Can we be both? When Kim Kardashian makes the minutiae of her life available online, which is she? With great rigour, this important book draws on a Kantian philosophy of ethics and legal frameworks to examine where we are and to suggest steps, conceptual and practical, to ensure the future is not dystopian. Privacy is one of the defining issues of our time; this lively book explains why this is so and the ways in which we might protect it. *Breaking Point* Rebecca Schwartz Greene, 2023-01-03 WINNER SOCIETY FOR

MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK. This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II. *Breaking Point* is the first in-depth history of American psychiatry in World War II. Drawn from unpublished primary documents, oral histories and the author's personal interviews and correspondence over years with key psychiatric and military policymakers, it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination, followed by Army and Navy pre and post induction examinations. Ultimately, 2.5 million men and women were rejected or discharged from military service on neuropsychiatric

grounds Never before or since has the United States engaged in such a program In designing Selective Service Medical Circular No 1 psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter While many American and European psychiatrists questioned this belief and huge numbers of American psychiatric casualties soon raised questions about screening s validity psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else Soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs and Blacks and Native Americans among others complained of bias A frustrated General George S Patton famously slapped two malingering neuropsychiatric patients in Sicily a sentiment shared by Marshall and Eisenhower though they favored a tamer style Yet psychiatric rejections evacuations and discharges mounted While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943 this was the exception But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself not predisposition precipitated breakdown leading military psychiatrists switched their emphasis from screening to prevention and treatment But this switch was too little too late and slowed by a year long series of Inspector General investigations even while numbers of psychiatric casualties soared Ironically despite and even partly because of psychiatrists wartime performance plus the emotional toll of war postwar America soon witnessed a dramatic growth in numbers popularity and influence of the profession culminating in the National Mental Health Act 1946 But veterans with PTSD not recognized until 1980 were largely neglected
