2014 Life Science November Exemplar Paper 1:

Management Consultancy and the British State Antonio E. Weiss, 2018-10-26 This book traces the emergence and development of the relationship between management consultancies and the British state. It seeks to answer three questions: why were management consultants brought into the machinery of the state; how has state power been impacted by bringing profit-seeking actors into the machinery of the state; and how has the nature of management consultancy changed over time. The book demonstrates the role consultants played in major developments in the postwar period. Specific case studies interrogate how consultancies influenced the policy fields of health service reform and social security benefits. This book will redefine debates amongst business historians and historians of the postwar British state about the nature of management consultancy and public sector reform.

The Uncanny Valley Hypothesis and Beyond Marcus Cheetham, 2018-05-02 A field of theory and research is evolving around the question highlighted in the Uncanny Valley Hypothesis: How does high realism in anthropomorphic design influence human experience and behaviour? The Uncanny Valley Hypothesis posits that a very humanlike character or object (e.g. robot prosthetic limb, doll) can evoke a negative affective (i.e. uncanny) state. Recent advances in robotic and computer graphic technologies in simulating aspects of human appearance, behaviour, and interaction have been accompanied therefore by theorising and research on the meaning and relevance of the Uncanny Valley Hypothesis for anthropomorphic design. Current understanding of the uncanny idea is still fragmentary, and further original research is needed. However, the emerging picture indicates that the relationship between humanlike realism and subjective experience and behaviour may not be as straightforward as the Uncanny Valley Hypothesis suggests. This Research Topic brings together researchers from traditionally separate domains including robotics, computer graphics, cognitive science, psychology, and neuroscience to provide a snapshot of current work in this field. A diversity of issues and questions are addressed in contributions that include original research, review, theory, and opinion papers.

The Puritan Ideology of Mobility Scott McDermott, 2022-02 *The Puritan Ideology of Mobility: Corporatism, the Politics of Place, and the Founding of New England Towns before 1650* examines the ideology that English Puritans developed to justify migration, their migration from England to New England, migrations from one town to another within New England, and often their repatriation to the mother country. Puritan leaders believed firmly that nations, colonies, and towns were all bodies politic that are living and organic social bodies. However, if a social body became distempered because of scarce resources or political or religious discord, it became necessary to create a new social body from the old in order to restore balance and harmony. The new social body was articulated through the social ritual of land distribution according to Aristotelian distributive justice. The book will trace this process at work in the founding of Ipswich and its satellite town in Massachusetts.

Dying in America Institute of Medicine, Committee on Approaching Death: Addressing Key End-of-Life Issues, 2015-03-19 For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United

States is often characterized by fragmented care inadequate treatment of distressing symptoms frequent transitions among care settings and enormous care responsibilities for families According to this report the current health care system of rendering more intensive services than are necessary and desired by patients and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life Death is not a strictly medical event Ideally health care for those nearing the end of life harmonizes with social psychological and spiritual support All people with advanced illnesses who may be approaching the end of life are entitled to access to high quality compassionate evidence based care consistent with their wishes Dying in America evaluates strategies to integrate care into a person and family centered team based framework and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families The findings and recommendations of this report will address the needs of patients and their families and assist policy makers clinicians and their educational and credentialing bodies leaders of health care delivery and financing organizations researchers public and private funders religious and community leaders advocates of better care journalists and the public to provide the best care possible for people nearing the end of life **Annals of the Carnegie Museum** ,2013 **General Catalogue of Printed Books** British Museum.
