The Cost of Free Money Paola Subacchi, 2020-09-15 A penetrating account of how unchecked capital mobility is damaging international cooperation polarizing the economic landscape and ultimately reshaping the global order When it comes to the afflictions of the global economy almost everyone and especially Donald Trump is quick to point the finger of blame at the state of international trade But what about unconstrained capital flows Unfettered capital has resulted in a string of financial and economic crises that have left our political systems strained and dialogue corroded The once perceived benefits of openness have been cast to the wayside and the cracks in the global order can no longer be ignored Paola Subacchi argues that international cooperation and interdependence have become crippled Regional restrictions will soon strengthen and a multipolar order will take shape leading to a distinctly transformed economic landscape in which China challenges the dominance of the US dollar Combining history analysis and prediction this book provides penetrating insight into the challenges facing the international economic order

The Wealth of (Some) Nations Zak Cope, 2019-03-20 In this provocative new study Zak Cope makes the case that capitalism is empirically inseparable from imperialism historically and today Using a rigorous political economic framework he lays bare the vast ongoing transfer of wealth from the poorest to the richest countries through the mechanisms of monopoly rent unequal exchange and colonial

tribute The result is a polarised international class structure with a relatively rich Global North and an impoverished exploited Global South Cope makes the controversial claim that it is because of these conditions that workers in rich countries benefit from higher incomes and welfare systems with public health education pensions and social security As a result the internationalism of populations in the Global North is weakened and transnational solidarity is compromised The only way forward Cope argues is through a renewed anti imperialist politics rooted in a firm commitment to a radical labour internationalism Environmental Impacts of Transnational Corporations in the Global South Paul Cooney, William

Sacher, 2018-11-30 This volume explores the impact of Transnational Corporations TNCs on the environment of the Global South during this period of neoliberal globalization It develops themes around transnational extractive activity the impact of transnational capital on indigenous populations and the role played by international institutions **The pursuit of**

sustainable agriculture in EU free trade agreements Luchino Ferraris, 2023-09-14 This book explores the extent to which EU Free Trade Agreements FTAs pursue sustainable agriculture in third country parties It contends that this should be part of a duty for the EU enshrined in the Treaties to promote its fundamental values in its external action It suggests that the extent to which this occurs in practice may be reviewed judicially by the Court of Justice of the European Union Against this background selected agreements concluded by the EU with developed and developing countries Canada South Korea Ukraine Chile SADC countries and Vietnam are taken as case studies The author concludes that in spite of the remarkable progress made hitherto EU trade policy is still far from being in line with the increasingly strong commitment of the EU to take the lead in the international arena for environmental and climate matters This work adopts primarily a legal methodology but it broaches the subject in interdisciplinary terms It is addressed not only to EU policy makers but also to scholars of different fields and to the wider public interested in topics that have become of common concern for the future of our planet With a foreword by Daniel Calleja Crespo Director General of the European Commission DG Environment
